Comments (use back if needed):

Leave the coal in the ground! We need to
transition to non-fossil-fuel, renewable,
non-polluting, sustainable energy now!
We need clean energy jobs with justice.
We cannot keep transporting coal and oil
by rail or pipeline with all the spills
and pollution. We cannot keep burning
fossil fuels and causing global warming
which is already killing thousands of people
and driving us closer to our own species'
extinction (and the extinction of lots of
other species, too). We are attacking
the life support system that allows
our species and lots of others to

exist on Earth. It is a suicidal, self-destructive program of chosen extinction to continue to use fossil fuels. It is a suicidal/genocide of our whole species and the destruction and extinction of lots of other species, too. We must STOP using fossil fuels. We must leave coal, oil, and gas in the ground. We must transition to non-polluting, renewable, sustainable energy sources and create clean energy jobs with justice. Leave the coal, oil, and gas IN THE GROUND. Our survival as a species depends upon it.
