Comments (use back if needed):

The BLM + Dept. of Interior needs to fully account for the cost of coal sold from public lands. Taxpayers are not getting a fair share of the coal leased from public lands. The fact that at least 10% of carbon emissions comes from coal mines on federal lands cuts against our U.S. climate reduction goals. And - the cost is \$70/bn →

but sold for 12¢/tn.

We need to account  
for all costs of coal  
when accounting for the  
cost!
