Comments (use back if needed):

The use of coal is outdated. We are in a GLOBAL state of emergency w/ respect to climate change & the preservation of resources. Native & Indigenous peoples have borne the burden of these effects disproportionately for too long. In solidarity w/ them, & other marginalized groups, we must look for better, renewable energy. TO BE CLEAR: We stand w/ coal-miners & their economic & social well-being. That is why ~~the~~ legislation must include jobs & transitional solutions to protect these labor markets. & individuals. Moving to cleaner,

renewable energy isn't just a moral obligation, it's an economic one. Waiting until coal is no longer viable will be too late for everyone. We deserve clean air, clean water, and clean jobs!
