Comments (use back if needed):

As a 20 year old college student, I fear
what will become of this planet and my
future if we continue to prop up dying,
extractive industries. Fossil fuels such as coal
promote economic dependence on an unsustainable
business, climate change, and racial injustice.
This is a truly global issue, and coal will be
obsolescent. Do not wait to phase coal out. Do
it now, while there is time and resources to
make a just transition for workers, communities, and the
planet.
