Comments (use back if needed):

We need to link the cost of mitigating
sea level rise to the affect of coal
produced emissions.

This cost should then be paid up front
for the annual production of coal
from leases on Public lands.

Payments should be made to the
treasury dept and applied to sea level
caused damage costs.

Comments (use back if needed):

A condition of any future coal
leases should be payment up
front of the cost of reclamation
to pristine original condition of the
site. This fee should not be a
bond but a deposit in the Federal
Treasury.

Comments (use back if needed):

It is conclusion of SCIENCE that burning
coal is largest source of emissions leading
to climate change. I am particularly
concerned about global sea rise caused
by warming of the ocean and melting of
global ice. I am concerned for friends
in the Marshal Islands who properties are
being flooded^{now} by the sea. I am concerned
for 80 million people who live ~~at~~ less
than 4 ft. above sea level in the Ganges
river delta, ~~Think~~ Think of the consequences
of climate change and keep coal in the ground.
