BLM Seeks Public Comment on Natural Gas Pipeline near Green River, Utah

MOAB, Utah—The Bureau of Land Management (BLM) Utah, Moab Field Office is seeking comments on an environmental assessment (EA) that analyzes a proposal from Gray Canyon Energy for a 10 inch buried natural gas pipeline. The purpose of the pipeline would be to transport dry natural gas from the existing Greentown Gas Processing Facility to the Green River Oil Upgrade facility in Green River, Utah, where it will be used to help power operations.

The proposed pipeline parallels existing Grand County roads. The EA analyzes three alternatives and addresses several issues raised during scoping, including air quality, socioeconomics, soils, wildlife, and traffic and transportation. A copy of the EA, including maps, is available on the BLM ePlanning website project page for this proposed right of way application (<http://go.usa.gov/xkVXB>).

Comments will be accepted by letter or email through November 21, 2016. Comments may be submitted electronically to blm_ut_mb_comments@blm.gov or mailed to the following address (Please reference “Gray Canyon Energy ROW” in the email subject line and address when submitting comments):

Mail

Bureau of Land Management
Moab Field Office
Attn: Gray Canyon Energy ROW
82 East Dogwood
Moab, Utah 84532

Before including an address, phone number, email address, or other personal identifying information in any comments, please be aware that the entire comment—including personal identifying information—may be made publicly available at any time. Requests to withhold personal identifying information from public review can be submitted, but the BLM cannot guarantee that it will be able to do so.

For additional information, please contact Jan Denney at (435) 259-2100. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to leave a message or question with the above individual. The FIRS is available 24 hours a day, seven days a week. Replies are provided during normal business hours.

The BLM manages more than 245 million acres of public land, the most of any Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. The BLM also administers 700 million acres of

sub-surface mineral estate throughout the nation. The BLM's mission is to manage and conserve the public lands for the use and enjoyment of present and future generations under our mandate of multiple-use and sustained yield. In Fiscal Year 2015, the BLM generated \$4.1 billion in receipts from activities occurring on public lands.
