

Thompson Creek Mine FEIS Errata, Updated April 14, 2015

The following errata apply to the text of the FEIS as published on March 27, 2015:

FEIS Section	FEIS Page	Change
1.9	1-22	Add Section 1.9.24. Idaho Roadless Rule
1.9.24	1-22	Add Idaho Roadless Rule – The USDA Forest Service adopted a roadless area conservation rule for National Forests (36 CFR Part 294) in Idaho in 2008. The rule established 250 Idaho Roadless Areas, assigned one of five established management themes to each area, and provided prohibition with exceptions or conditioned permissions governing road construction, timber cutting, and discretionary mineral development.
3.12.1.1	3-205	The S. Creek IRA (06-005; 99,620 acres) is on NFS land generally north, west, and south of the analysis area. North of the analysis area, the perimeter of the IRA is along the top of the Buckskin-Basin Creek ridgeline, as close as 200 feet to the MMPO area (Alternative M2). The northernmost existing and planned extent of the TSF and its support facilities would include approximately northernmost support facilities for the TSF extend 750 feet 1 acre of the IRA, which in this area also contains a network of historic mining roads (some of which are used to access the Cinnabar mining claims north of the TSF).
4.12.1.1	4-146 4-147	There could would not be any be less than 1 acre of mine-related development in the S. Creek IRA. Users of the IRA would not experience any different conditions from those currently experienced due to the mine. Changes to the roadless character and wilderness attributes of the S. Creek IRA would be negligible. There would not be any other effects to SMAs.
6.2	6-4	Add: The Idaho Roadless Commission was briefed on the project.
Chapter 8	8-22	HDR (2014b) Thompson Creek Mine wetland and stream mitigation plan: Squaw Creek. Boise, Idaho: HDR Engineering, Inc. Unpublished report prepared for Thompson Creek Mining Company, January August 2014, Appendix A - Map 2 revised 17 November 2014, 28 p. and Appendices A-B (46 p. total). Copy in Challis, Idaho: US Department of the Interior, Bureau of Land Management, Challis Field Office, Case File IDI 33145.

Appendix B ¹	Page 1	Approximately 3.36 3.39 acres of wetlands and 9,899 10,641 linear feet of stream channels were identified within the proposed expansion area. Of the 3.36 3.39 acres of wetlands, 2.93 acres of wetlands are located along Mill Creek. The remaining 0.43 0.46 acres of wetlands are small discontinuous areas along Pat Hughes Creek and the West Fork of Bruno Creek Bruno Creek and its tributaries.
Appendix B	Page 4	Based on this ratio, mitigation would only be required along 2,475 2,661 linear feet of streambank.
Appendix B	Page 5, Table 1	2 nd row, 2 nd column, 3.36 3.393 ac 2 nd row, 3 rd column, 5.64 5.80 ac 2 nd row, last column, Restore selected wetland area (5.7 5.8 acres) along Squaw Creek. 3 rd row, 2 nd column, 9,899 10,641 LF
Appendix B	Page 14	Wetland area 1 (5.7 5.8 acres) had approximately 4 feet (average) of earthen fill placed in this area.
Appendix B	Page 15, Table 2	2 nd row, 2 nd column, 5.7 5.8 acres 2 nd row, 4 th column, 36,784 37,429 2 nd row, last column, 147,136.00 149,717.33 3 rd row, 4 th column, 5.7 5.8 3 rd row, last column, 12,540.00 12,760.00 8 th row (no lower border), last column, 177,091.00 179,892.33 9 th row (no upper or lower borders), last column, 35,418.20 35,978.47 10 th row (no upper border), last column, 212,509.20 215,870.80
Appendix B	Page 15, third bullet	The proposed wetland area (5.7 5.8 acres) is the largest wetland complex...
Appendix B	Page 25	The project would impact 3.36 3.39 acres of jurisdictional wetlands.

Appendix B	Page 25, Table 6	<p>2nd row, 2nd column, 0.032 0.068 2nd row, 4th column, 0.16 0.34 2nd row, last column, 5.7 5.8 acres 3rd row, 2nd column, 0.140 0.133 3rd row, last column, 5.7 5.8 acres 4th row, last column, 5.7 5.8 acres 5th row, last column, 5.7 5.8 acres 6th row, 4th column, 4.41 4.39 6th row, last column, 5.7 5.8 acres 7th row, 2nd column, 3.36 3.39 7th row, 4th column, 5.64 5.80 7th row, last column, 5.7 5.8 acres</p>
Appendix B	Page 25	The project would impact 9,899 10,641 linear feet of headwater streams.
Appendix B	Page 25, Table 7	<p>2nd row, 2nd column, 1,753 3,215 3rd row, 2nd column, 3,749 3,029 5th row, 2nd column, 9,899 10,641</p>

¹ An incorrect version of the Wetlands Mitigation Plan (January 2014) was inadvertently included as Appendix B; however, the wetlands and stream channel data included in Section 3.9 and Section 4.9 of the FEIS is correct. The most current version of the Wetlands Mitigation Plan (August 2014) is included in the project record. The errata reflect what is contained in the Wetlands Mitigation Plan (August 2014).
