
Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Barren Crosses Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses White-tailed prairie dog modeled habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Migratory bird high-value habitat
Special Status Plants	Within 300 feet of Mussentuchit gilia (<i>Aliciella tenuis</i>) Within 300 feet of Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character In VRM Class I - Preserve existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character In ACEC - Area of Critical Environmental Concern
Water Resources	In Intermittent stream
Misc. Resources	In, crosses Erosive soil - Low potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Closing this route to OHV use minimizes the potential for route proliferation on public land. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Closing this route to OHV use minimizes the potential for route proliferation on public land. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 8/27/2020

Evaluators: Kegen Benson , Biologist Michael Knight , GIS Specialist Ann Glubczynski , Environmental Planning Coordinator Rebecca Anderson , Geologist Mike Tweddell , Range and Wild Horses and Burros Kris Carambelas , Archaeologist	Natalie Fewings , Archaeologist Veronica Kratman , Realty Specialist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Myron Jeffs , Outdoor Recreation Specialist Scott Bartlett , Resource Specialist

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.64 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route: <ul style="list-style-type: none"> • either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? • provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? • provide a principal means of connectivity within a Travel Management Area or Management Zone? • exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? • provide an important linkage between Travel Management Areas or Management Zones? 	YES YES NO YES NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact: <ul style="list-style-type: none"> • State or Federal special status species or their habitat? • cultural or any other specially-protected resources or objects identified in Agency planning documents? • any special area designations, e.g., National Monuments? • any other resources of concern? 	YES YES YES YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	Stock 4 Wheel Drive
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character In VRM Class I - Preserve existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In ACEC - Area of Critical Environmental Concern
Water Resources	Leads to Intermittent stream
Misc. Resources	In Erosive soil - Low potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	Leads to Noxious weeds (Salt cedar) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motor

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route: <ul style="list-style-type: none"> • either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? 	YES
<ul style="list-style-type: none"> • provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? 	YES
<ul style="list-style-type: none"> • provide a principal means of connectivity within a Travel Management Area or Management Zone? 	NO
<ul style="list-style-type: none"> • exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? 	YES
<ul style="list-style-type: none"> • provide an important linkage between Travel Management Areas or Management Zones? 	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact: <ul style="list-style-type: none"> • State or Federal special status species or their habitat? 	YES
<ul style="list-style-type: none"> • cultural or any other specially-protected resources or objects identified in Agency planning documents? 	YES
<ul style="list-style-type: none"> • any special area designations, e.g., National Monuments? 	YES
<ul style="list-style-type: none"> • any other resources of concern? 	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS5022 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	Stock 4 Wheel Drive
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Sagebrush Shrubland In Barren
Special Status Animals	In, crosses Other - Wash, Intermittent, Perennial In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 750 feet of White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	In Intermittent stream
Misc. Resources	In, crosses Erosive soil - Low potential In PFYC Class 3 - Moderate In Erosive soil - Moderate potential
Resource Issues	In Noxious weeds (Salt cedar) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Additional Information: County Class D.

General Evaluation Questions

Does this route: <ul style="list-style-type: none"> • either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? • provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? • provide a principal means of connectivity within a Travel Management Area or Management Zone? • exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? • provide an important linkage between Travel Management Areas or Management Zones? 	YES YES NO YES NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact: <ul style="list-style-type: none"> • State or Federal special status species or their habitat? • cultural or any other specially-protected resources or objects identified in Agency planning documents? • any special area designations, e.g., National Monuments? • any other resources of concern? 	YES YES YES YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources? Route SS5024 may meet the various needs of this route while minimizing impacts or cumulative effects.	YES

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Lease Facilities	ROW - Mineral Materials Site
	Water Rights
Mineral Facilities	Free use pit

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Barren In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 750 feet of White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p><u>Memo(s):</u> Portions of this route are not designated in the RMP.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motor

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Mineral Materials Site
Range Facilities	Active Allotment
Mineral Facilities	Free use pit

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In, crosses Barren In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (Aliciella tenuis) In Wright fishhook cactus (Sclerocactus wrightiae) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to a mineral materials site for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	ATV
	Motorcycle
	UTV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Misc. Resources	In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Leads to Noxious weeds (Salt cedar) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	ATV
	Motorcycle
	UTV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (Aliciella tenuis) In Wright fishhook cactus (Sclerocactus wrightiae) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Intermittent stream Within 200 meters of Spring
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat Within 100 meters of Fisheries (sport & native)
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Floodplain Within 100 meters of Perennial stream Within 100 meters of Riparian Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat71: The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Rat67: By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.31 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Corral

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat Within 100 meters of Fisheries (sport & native)
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 1/4 mile of Lands w/ Wilderness Character Within 100 meters of Floodplain Within 100 meters of Perennial stream Within 100 meters of Riparian Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

---	---

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 1.93 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	In Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	In Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to single-track users, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Parking Area - Undeveloped
Activities	Camping
Modes of Transportation	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In, Within 1800 feet of Migratory bird high-value habitat Within 100 meters of Fisheries (sport & native)
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Floodplain Within 100 meters of Perennial stream Within 100 meters of Riparian Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	In, leads to Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to single-track users, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 1.13 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pasture Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Barren In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In, Within 1800 feet of Migratory bird high-value habitat Crosses, Within 100 meters of Fisheries (sport & native)
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III In Inventory Class II
Special Management Areas	In VRM Class I - Preserve existing character In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character In ACEC - Area of Critical Environmental Concern
Water Resources	Crosses, Within 100 meters of Floodplain Crosses, Within 100 meters of Perennial stream Crosses, Within 100 meters of Riparian Crosses, Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	In Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to single-track users, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS5012 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Corral

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash
Misc. Resources	Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

---	---

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 2.04 mi.	Width: Graded Track	Class: Road	Use Level: Low
Route Type(s):	Connector		
Surface:	Bladed	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Copper Globe/Lone Tree Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS4515, SS4521, SS4532, SS4537, SS4557, SS4572, SS4573, SS4575, SS4580, SS5001, SS5002, SS5010, SS5012, SS5050, SS5051, SS5069, SS5087, SS6078, SS6079, SS6089

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Barren
Special Status Animals	In, crosses Other - Wash, Intermittent, Perennial In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Spotted bat modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Mussentuchit gilia (Aliciella tenuis) In Wright fishhook cactus (Sclerocactus wrightiae) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Vista
Activities	Vehicle Exploring
	Camping
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Copper Globe/Lone Tree Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS4515, SS4521, SS4532, SS4537, SS4557, SS4572, SS4573, SS4575, SS4580, SS5001, SS5002, SS5010, SS5012, SS5050, SS5051, SS5069, SS5087, SS6078, SS6079, SS6089

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Spotted bat modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In VRM Class I - Preserve existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character Within 1/4 Mile of Statutory Wilderness
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping Photography
Modes of Transportation	UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Spotted bat modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In VRM Class I - Preserve existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character Within 1/4 Mile of Statutory Wilderness
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 8/27/2020

Evaluators:

Kegen Benson , Biologist	Natalie Fewings , Archaeologist

Mike Tweddell , Range and Wild Horses and Burros	Myron Jeffs , Outdoor Recreation Specialist
Scott Bartlett , Resource Specialist	Jerrad Goodell , Aquatic Ecologist
Brianne Emery , Natural Resources Planner	

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 4.04 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Photography Sightseeing
Modes of Transportation	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Modified 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Barren In Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Spotted bat modeled habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	In Intermittent stream
Misc. Resources	Within 100 meters of Wash In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to single-track users, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.94 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Equestrian
	Hiking
	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Barren Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Spotted bat modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	In Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: **Rat6:** Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. **Rat23:** By limiting vehicle width to single track or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. **Rat29:** Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. **Rat34:** Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage. **Rat3:** This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 8/27/2020

Evaluators: Kegen Benson , Biologist Michael Knight , GIS Specialist Ann Glubczynski , Environmental Planning Coordinator Rebecca Anderson , Geologist Mike Tweddell , Range and Wild Horses and Burros Scott Bartlett , Resource Specialist Brianne Emery , Natural Resources Planner	Natalie Fewings , Archaeologist Veronica Kratman , Realty Specialist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Myron Jeffs , Outdoor Recreation Specialist Jerrad Goodell , Aquatic Ecologist
---	---

TMA:	San Rafael Swell TMA	Route Name:	Miller's Canyon/Willow Sp
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area	Class:	Road
Length: 6.56 mi.	Width: Graded Track	Use Level: Medium	
Route Type(s):	Connector	Maintained:	Regularly by Emery County
Surface:	Bladed	Constructed:	None identified by IDT
Origin:	None identified by IDT		
Jurisdictions:	BLM; State Land		

Additional Information: County Class B 912. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	ROW - Other (Community pit)
	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Cattleguard
	Pasture Fence
	Gate
	Pond/Dam/Reservoir
	Livestock Trailing
	Mineral Supplement Location
	Monitoring Site
Mineral Facilities	Community pit

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Vehicle Exploring Camping Hunting Photography Sightseeing
Modes of Transportation	UTV ATV Motorcycle Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Copper Globe/Lone Tree Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS4515, SS4521, SS4532, SS4537, SS4557, SS4572, SS4573, SS4575, SS4580, SS5001, SS5002, SS5010, SS5012, SS5050, SS5051, SS5069, SS5087, SS6078, SS6079, SS6089

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Barren In, crosses Other - Wash, Intermittent, Perennial In, crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area Within 1/4 Mile of SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential Crosses, Within 150 feet of Cryptobiotic soil In Fugitive dust - High potential In PFYC Class 2 - Low In PFYC Class 5 - Very high
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In, crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Musk thistle (south end))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir (Admin route)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
Modes of Transportation	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) Crosses Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In PFYC Class 2 - Low In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide si

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to single-track users, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 8.74 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description

This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In, crosses Barren Crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) Crosses Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Migratory bird high-value habitat Crosses Fisheries (sport & native)
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream Crosses Wash Crosses Floodplain Crosses Perennial stream Crosses Riparian
Misc. Resources	In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In PFYC Class 2 - Low In PFYC Class 3 - Moderate In, leads to, crosses, Within 150 feet of Cryptobiotic soil (From TLA north) In PFYC Class 5 - Very high
Resource Issues	In, leads to, crosses, Within 1/4 mile of Noxious weeds (Salt cedar (from TLA north)) Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton (from TLA north))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the ar

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to single-track users, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 1.26 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) Crosses Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 5 - Very high In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential
Resource Issues	In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Due to the low traffic volume and low speeds expected, allowing continued use of this route would contribute to the overall route network minimizing the potential for harassment of wildlife. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by single track vehicles (including motorcycles and all non-motorized modes), year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: **Rat6:** Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. **Rat23:** By limiting vehicle width to single track or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. **Rat29:** Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. **Rat34:** Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage. **Rat3:** This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Blake Baker): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>)
	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
	In WHB Herd Area
	In WHB Herd Management Area
Misc. Resources	In Erosive soil - High potential / saline soils
	In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.14 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Cultural / Historical Viewing
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate In PFYC Class 5 - Very high
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Cultural / Historical Viewing
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class I - Preserve existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.43 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Pond/Dam/Reservoir (x2)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Cultural / Historical Viewing
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In PFYC Class 5 - Very high
Resource Issues	In Invasive vegetation (Russian thistle; Cheatgrass) In Noxious weeds (Salt cedar (west end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.71 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Cultural / Historical Viewing Camping
Modes of Transportation	UTV ATV Motorcycle Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Mixed Blackbrush/Sand Shrubland In, crosses Barren In, crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high In Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	Leads to Invasive vegetation (Russian thistle; Cheatgrass; Halogeton) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high In Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Leads to Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate m

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland Crosses Other - Wash, Intermittent, Perennial In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Leads to, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 1.56 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - High potential / saline soils In Erosive soil - Low potential In, crosses Erosive soil - Moderate potential In PFYC Class 5 - Very high
Resource Issues	Crosses Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 5 - Very high Leads to Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 5 - Very high In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	Crosses Cryptobiotic soil Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate m

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Last Chance Rd
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 11.06 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	Graveled; Bladed	Maintained:	Regularly by Emery County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class B 921. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights R.S. 2477 claim
Range Facilities	Active Allotment Allotment Fence Pond/Dam/Reservoir Mineral Supplement Location Corral Well/Windmill Tank/Trough Pipeline Monitoring Site
Mineral Facilities	Mining claim

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Cultural / Historical Viewing
	Sightseeing
	Photography
	Hunting
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Copper Globe Network Area and the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In, crosses Pinyon-Juniper Woodland In, crosses Barren Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat Crosses, Within 1800 feet of Migratory bird high-value habitat In, Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In, Within 1/4 Mile of WHB Herd Area Within 1/4 mile of Lands w/ Wilderness Character Within 1/4 Mile of WHB Herd Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In, crosses Erosive soil - Moderate potential Crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In, crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland In, crosses Barren In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In, crosses Erosive soil - High potential / saline soils Crosses Invasive vegetation (Halogeton; Russian thistle) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring Photography Sightseeing
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland In, crosses Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	Leads to, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Leads to, crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
<p>Memo(s): This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 2.63 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Other (Rock tank)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren In, crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	Leads to, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Photography Sightseeing
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Barren In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Photography Sightseeing
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial Crosses Barren Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high In, crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Other (Rock tank)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In, crosses Barren Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash In Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 5 - Very high Crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential
Resource Issues	Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash In Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high Crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Kyle Smith, Daniel Kauffman, Jaydon Mead): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.47 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Photography
	Sightseeing
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat In Mule deer winter crucial Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash In Intermittent stream
Misc. Resources	In Erosive soil - Low potential Crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle (east end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 1.86 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur; Y Intersection		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In, Within 1/4 Mile of WHB Herd Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle (west end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.29 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Photography
	Sightseeing
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) In, leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Photography
	Sightseeing
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Photography Sightseeing Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
	In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
	In Lands w/ Wilderness Character
	In WHB Herd Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential
	In Erosive soil - High potential / saline soils
	In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): Portions of this route are not designated in the RMP.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential
Resource Issues	Leads to, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
<p>Memo(s): Portions of this route are not designated in the RMP.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Sightseeing

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - High potential / saline soils In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Sightseeing

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area Within 1/4 Mile of WHB Herd Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In PFYC Class 2 - Low In, crosses Erosive soil - High potential / saline soils In PFYC Class 5 - Very high In Erosive soil - Moderate potential In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle (south end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
	In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
	In Lands w/ Wilderness Character
	In WHB Herd Area
Water Resources	Crosses Wash
	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 2 - Low
	In Erosive soil - Moderate potential
	In Erosive soil - Low potential
	In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Other (Butch Cassidy inscription)
Activities	Camping Photography Cultural / Historical Viewing
Modes of Transportation	Stock 4 Wheel Drive UTV ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 4 - High Crosses Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) In, crosses Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.06 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Other (Temporary corral site)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area In Lands w/ Wilderness Character In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 4 - High
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.03 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In Lands w/ Wilderness Character In WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In, leads to Invasive vegetation (Halogeton; Russian thistle) In, leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a pond, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/14/2020

Evaluators: **Kegen Benson**, Biologist
Michael Knight, GIS Specialist
Stephanie Bauer, Range Specialist
Myron Jeffs, Outdoor Recreation Specialist
David Halverson, Legal Counsel
Marc Johson, Natural Resource Specialist

Natalie Fewings, Archaeologist
Veronica Kratman, Realty Specialist
Jim Jennings, Public Lands Administrator
Jerrad Goodell, Aquatic Ecologist
Nate Packer, NEPA Coordinator
Adam Robison, New User

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.34 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren
Special Status Animals	Crosses Other - Wash, Intermittent, Perennial In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In Lands w/ Wilderness Character In WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	In PFYC Class 5 - Very high In Invasive vegetation (Halogeton; Russian thistle) Leads to, crosses Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a pond, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a pond, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 2.67 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Motorcycle
	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Lower Last Chance Loop
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area	Class:	Road
Length: 7.82 mi.	Width: Graded Track	Use Level:	Medium
Route Type(s):	Connector	Maintained:	Regularly by Emery County
Surface:	Bladed	Constructed:	None identified by IDT
Origin:	None identified by IDT		
Jurisdictions:	BLM; State Land		
Additional Information: County Class B 920. Route designation applies only to those portions of the route located on public lands managed by BLM.			

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Pond/Dam/Reservoir
	Exclosure Fence
	Gate
	Livestock Watering Access
	Mineral Supplement Location
	Monitoring Site
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Vehicle Exploring Camping Photography Sightseeing
Modes of Transportation	UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	OHV Destination Route
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren In, crosses Mixed Sagebrush Shrubland In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area Within 1/4 Mile of SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In PFYC Class 2 - Low In Fugitive dust - High potential
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Gate
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Vehicle Exploring Camping Photography Sightseeing
Modes of Transportation	UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	OHV Destination Route
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In WHB Herd Area Within 1/4 Mile of SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character Leads to Statutory Wilderness
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In PFYC Class 2 - Low In Fugitive dust - High potential
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 13.46 mi.	Width: Dual Track	Class: Wilderness Inventory	Use Level: Medium Road
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Regularly by BLM
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Gate
	Pond/Dam/Reservoir
	Spring Development
	Pipeline
	Mineral Supplement Location
	Monitoring Site
	Tank/Trough

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Vehicle Exploring Camping Photography Sightseeing
Modes of Transportation	UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
Activities	OHV Destination Route
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat Crosses, Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III In VRM Class II - Retain existing character In Inventory Class IV
Special Management Areas	Crosses WHB Herd Area In SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character Within 1/4 Mile of Statutory Wilderness Crosses WHB Herd Management Area
Water Resources	Crosses Wash In, crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Crosses Cryptobiotic soil Crosses PFYC Class 2 - Low In Fugitive dust - High potential
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Report generated on 6/2/2024

Copyright © 2024 by ARS, Inc. All rights reserved. No part of this publication may be reproduced, distributed, or transmitted in any form or by any means, including photocopying, recording, or other electronic or mechanical methods, without the prior written permission of the publisher, except in the case of brief quotations embodied in critical reviews and certain other noncommercial uses permitted by copyright law.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Parking Area - Undeveloped
	Vista
Activities	Vehicle Exploring
	Camping
	Photography
	Sightseeing
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush Crosses Mixed Mountain Forest/Woodland In, crosses Mixed Blackbrush/Sand Shrubland In Barren In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In, crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Crosses, Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character Within 1/4 Mile of Statutory Wilderness Within 1/4 Mile of ACEC - Area of Critical Environmental Concern
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Crosses Cryptobiotic soil In Fugitive dust - High potential In PFYC Class 3 - Moderate
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In, crosses Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 2.39 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	Bladed	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (*leads directly to the listed jurisdiction or facility, and IS the main route used for access*)

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access (*leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access*)

Type	Description
Range Facilities	Tank/Trough
	Pipeline

Link Access (*does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route*)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Photography
	Sightseeing
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
Activities	Hunting
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial In Barren Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area Leads to Statutory Wilderness
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In Fugitive dust - High potential In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 1.88 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
	Water Rights
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Pond/Dam/Reservoir
	Enclosure Fence
	Gate
	Well/Windmill

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Photography
	Sightseeing
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Barren In, crosses Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Leads to Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream Within 100 meters of Well
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Initial Evaluation Date: 9/14/2020

Evaluators:

Kegen Benson , Biologist	Natalie Fewings , Archaeologist
Michael Knight , GIS Specialist	Veronica Kratman , Realty Specialist
Stephanie Bauer , Range Specialist	Jim Jennings , Public Lands Administrator
Jerrad Goodell , Aquatic Ecologist	Nate Packer , NEPA Coordinator
Marc Johson , Natural Resource Specialist	Adam Robison , New User
Braden Sheppard , Legal Counsel	Jaydon Mead , Recreation Technician

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.04 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Loop		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Exclosure Fence
	Gate
	Pipeline
	Tank/Trough
	Well/Windmill

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Well Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
NO	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
	Hunting
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In San Rafael Swell Recreation Area
Water Resources	Crosses Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Pond/Dam/Reservoir
	Pipeline
	Tank/Trough

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial Crosses Mixed Desert Saltbush In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Leads to, Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In San Rafael Swell Recreation Area Within 1/4 Mile of ACEC - Area of Critical Environmental Concern
Water Resources	Crosses Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping Photography Sightseeing
Modes of Transportation	UTV ATV Motorcycle Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In San Rafael Swell Recreation Area Within 1/4 Mile of ACEC - Area of Critical Environmental Concern
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils Leads to Steep slopes In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Vista
Activities	Vehicle Exploring
	Camping
	Photography
	Sightseeing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class II
Special Management Areas	In VRM Class II - Retain existing character In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In San Rafael Swell Recreation Area Within 1/4 Mile of ACEC - Area of Critical Environmental Concern
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential In Erosive soil - High potential / saline soils Leads to Steep slopes In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 1.95 mi.	Width: Dual Track	Class: Wilderness Inventory	Use Level: Low Road
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Vista
Activities	Vehicle Exploring
	Camping
	Photography
	Sightseeing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In, crosses Mixed Sagebrush Shrubland In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class II
Special Management Areas	In VRM Class II - Retain existing character In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In, Within 1/4 mile of San Rafael Swell Recreation Area Within 1/4 Mile of WHB Herd Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential In, leads to, Within 50 feet of Steep slopes In PFYC Class 2 - Low In, crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping Photography Sightseeing
Modes of Transportation	UTV ATV Motorcycle Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential Leads to Steep slopes In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping
	Photography
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Barren In, crosses Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness In Lands w/ Wilderness Character
Water Resources	In, leads to WHB Herd Area Crosses Intermittent stream Crosses Wash Within 200 meters of Spring
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Mine hazard

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 4.25 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Medium
Route Type(s):	Connector; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Vista
Activities	Vehicle Exploring
	Camping
	Photography
	Sightseeing
	Hiking
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Barren In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In, Within 1/4 mile of Pronghorn year-long crucial habitat In, Within 1/4 mile of Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character Within 1/4 Mile of Statutory Wilderness In WHB Herd Area In WHB Herd Management Area
Water Resources	In, crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential In Erosive soil - High potential / saline soils Crosses PFYC Class 1 - Very low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Barren In Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to, crosses Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hiking
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping
	Photography
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush In, crosses Barren In, crosses Other - Wash, Intermittent, Perennial Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Desert bighorn sheep crucial year-long habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area In WHB Herd Management Area Leads to Statutory Wilderness
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.15 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hiking
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping
	Photography
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In Lands w/ Wilderness Character In WHB Herd Area In WHB Herd Management Area Leads to Statutory Wilderness
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS5146 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Pond/Dam/Reservoir

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep crucial year-long habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Blackbrush/Sand Shrubland In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In PFYC Class 1 - Very low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.49 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Barren Crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Spotted bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character Within 1/4 Mile of Statutory Wilderness
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	Within 100 meters of Wash In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area
	Within 1/4 mile of Lands w/ Wilderness Character
	In WHB Herd Area
	In WHB Herd Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In Erosive soil - Low potential
	In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)
	Leads to, crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 1.23 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Spring Development
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Sagebrush Shrubland In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) Leads to Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class II In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream Within 200 meters of Spring
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In Erosive soil - Low potential In PFYC Class 1 - Very low In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a developed spring, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a developed spring, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 3.7 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Gate

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential In PFYC Class 3 - Moderate In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Allotment Fence
	Gate
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial Crosses Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In PFYC Class 2 - Low
Resource Issues	Crosses Erosive soil - High potential / saline soils Leads to, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.61 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial In Barren In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In PFYC Class 2 - Low Crosses Erosive soil - Low potential
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for cons

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Sand Cove Spring Rd
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 1.92 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Spur		
Surface:	Bladed	Maintained:	Regularly by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class B 924. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Gate
	Pond/Dam/Reservoir
	Spring Development

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Other - Wash, Intermittent, Perennial In, crosses Barren In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class IV
Special Management Areas	In WHB Herd Area In, crosses WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream Within 200 meters of Spring
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils
Resource Issues	Leads to, crosses Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Spring Development

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Barren Crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to, crosses, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to, Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream Within 200 meters of Spring
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In, crosses Erosive soil - Moderate potential
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.05 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar) Leads to, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Agency Facilities	Other (Rain gauge)
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	In, leads to, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a rain gauge, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Other (Trap)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description

Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a trap location, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a trap location, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) Leads to, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.2 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pipeline
	Pond/Dam/Reservoir
	Gate
	Exclosure Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
	Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat
	Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class IV
Special Management Areas	In WHB Herd Area
	In WHB Herd Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate
	In Erosive soil - Moderate potential
	In Erosive soil - Low potential
Resource Issues	Leads to, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)
	Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Camping OHV Destination Route
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland Crosses Other - Wash, Intermittent, Perennial In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In, leads to Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Camping OHV Destination Route
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial In Barren In, crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Camping OHV Destination Route
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In WHB Herd Area In WHB Herd Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Water Resources	Within 100 meters of Intermittent stream In Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Road
Range Facilities	Active Allotment
	Cattleguard
	Allotment Fence
	Water Haul Site
	Mineral Supplement Location
Mineral Facilities	Mining claim
	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
Modes of Transportation	Motorcycle
	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Desert bighorn sheep high-value year-long Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/15/2020

Evaluators: Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Nate Packer , NEPA Coordinator Adam Robison , New User William Brant , Archaeologist	Michael Knight , GIS Specialist Stephanie Bauer , Range Specialist Jerrad Goodell , Aquatic Ecologist Marc Johson , Natural Resource Specialist Myron Jeffs , Outdoor Recreation Specialist Braden Sheppard , Legal Counsel
---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 3.09 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Water Haul Site
	Mineral Supplement Location
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Barren Crosses Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses White-tailed prairie dog modeled habitat (S)
Managed Species	In Desert bighorn sheep high-value year-long Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character In VRM Class I - Preserve existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area Leads to ACEC - Area of Critical Environmental Concern
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (South end of route)
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar) Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Evaluators: Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Nate Packer , NEPA Coordinator Adam Robison , New User William Brant , Archaeologist	Michael Knight , GIS Specialist Stephanie Bauer , Range Specialist Jerrad Goodell , Aquatic Ecologist Marc Johson , Natural Resource Specialist Myron Jeffs , Outdoor Recreation Specialist Braden Sheppard , Legal Counsel
---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.61 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Water Haul Site
Mineral Facilities	Mining claim
	Oil/Gas - Plugged and Abandoned

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Barren In, crosses Mixed Sagebrush Shrubland In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep high-value year-long In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character In VRM Class I - Preserve existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils Crosses Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/15/2020

Evaluators: Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Nate Packer , NEPA Coordinator Adam Robison , New User William Brant , Archaeologist	Michael Knight , GIS Specialist Stephanie Bauer , Range Specialist Jerrad Goodell , Aquatic Ecologist Marc Johson , Natural Resource Specialist Myron Jeffs , Outdoor Recreation Specialist Braden Sheppard , Legal Counsel

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Desert bighorn sheep high-value year-long In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character In VRM Class I - Preserve existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Sagebrush Shrubland In, crosses Mixed Desert Saltbush In Barren In, crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Desert bighorn sheep high-value year-long In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Water Haul Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush Crosses Barren Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Desert bighorn sheep high-value year-long In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 5.81 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Medium
Route Type(s):	Connector; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
	ROW - Road
	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Pond/Dam/Reservoir
	Gate
	Cattleguard
	Livestock Trailing
	Livestock Watering Access
	Monitoring Site
	Pipeline
	Tank/Trough
	Water Haul Site
	Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Photography
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III In VRM Class I - Preserve existing character In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Leads to ACEC - Area of Critical Environmental Concern In, crosses Intermittent stream Within 200 meters of Spring Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (On south end) In PFYC Class 2 - Low
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) In, crosses Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on a pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	NO
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Blackbrush/Sand Shrubland In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 200 meters of Spring Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Leads to, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Tank/Trough
	Pipeline
	Monitoring Site
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush In Barren In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash In Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In, leads to Invasive vegetation (Halogeton; Russian thistle) In, leads to Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.08 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class I - Preserve existing character In Inventory Class II
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In ACEC - Area of Critical Environmental Concern In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Road Other (UDOT)
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class I - Preserve existing character In Inventory Class II
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In ACEC - Area of Critical Environmental Concern In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Cattleguard
	Allotment Fence
	Gate

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.26 mi.	Width: Graded Track	Class: Road	Use Level: Low
Route Type(s):	Spur		
Surface:	Bladed		
Origin:	None identified by IDT	Maintained:	Minimally by BLM
Jurisdictions:	BLM; State Land	Constructed:	None identified by IDT

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Pond/Dam/Reservoir
	Cattleguard
	Allotment Fence
	Gate

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Barren In Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Pond/Dam/Reservoir
	Gate
	Mineral Supplement Location
	Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Mineral Facilities	AML site

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Rock Hounding
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Blackbrush/Sand Shrubland In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Pinyon-Juniper Woodland Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to, crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to, crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char. In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In, leads to WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Intermittent stream Within 200 meters of Spring Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (South end of route)
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock) Leads to Mine hazard

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited to Designated Routes</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 5.82 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Gate
	Mineral Supplement Location
	Monitoring Site
	Allotment Fence
	Cattleguard
	Other (Drift fence)
Mineral Facilities	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Rock Hounding
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Barren Crosses Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In WHB Herd Area In, leads to WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (South end of route) In PFYC Class 5 - Very high
Resource Issues	Leads to, crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited to Designated Routes</p> <p>Designation per 43 CFR § 8342.1: OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/15/2023 Jaydon Mead, Daniel Kauffman, Jared Brogan, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Gate
	Mineral Supplement Location
	Allotment Fence
	Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Pinyon-Juniper Woodland In, crosses Barren Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In WHB Herd Area In, leads to WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 5 - Very high
Resource Issues	In, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.68 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Gate
	Mineral Supplement Location
	Allotment Fence
	Monitoring Site
	Cattleguard
	Pond/Dam/Reservoir
	Corral

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Gate
	Allotment Fence

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area In ACEC - Area of Critical Environmental Concern
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. The route crosses or is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Pond/Dam/Reservoir

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping Vehicle Exploring Rock Hounding
Modes of Transportation	UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In, crosses Mixed Sagebrush Shrubland In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil (South end of route)
Resource Issues	In PFYC Class 5 - Very high Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat71: The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Rat74: The sub-watershed in which the route is located is dominated by soils which are identified as having a severe hazard of erosion on roads and trails. These routes are more likely to affect water quality than routes which are present on less erosive soils. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 5.8 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Allotment Fence
	Gate
	Livestock Trailing
	Mineral Supplement Location
	Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Allotment Fence
	Gate

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In, crosses Barren Crosses Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat Within 1/2 mile of Raptor nest (non-TES)
Special Status Plants VRM/RSC	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class II - Retain existing character In VRM Class IV - Major Modification
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 5 - Very high Crosses Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In, leads to Invasive vegetation (Halogeton; Russian thistle; Burdock (leads to))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Due to the low traffic volume and speeds expected on this route, allowing authorized and permitted use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush In Barren In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class II - Retain existing character In VRM Class IV - Major Modification
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil Leads to Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In, leads to Invasive vegetation (Halogeton; Russian thistle; Burdock (leads to))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Due to the low traffic volume and speeds expected on this route, allowing authorized and permitted use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Due to the low traffic volume and speeds expected on this route, allowing authorized and permitted use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.35 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class II - Retain existing character In VRM Class IV - Major Modification
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	Crosses Erosive soil - Low potential Within 1/4 mile of Noxious weeds (Salt cedar) In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Allotment Fence
	Gate

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Barren In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited to Designated Routes</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.25 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate In Erosive soil - Low potential
Resource Issues	Leads to, crosses Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Due to the low traffic volume and speeds expected on this route, allowing authorized/permitted use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Due to the low traffic volume and speeds expected on this route, allowing authorized/permitted use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Vista
Activities	Vehicle Exploring
	Rock Hounding
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Sagebrush Shrubland In Barren In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	In Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 5 - Very high

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Length: 0.12 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils
Resource Issues	Leads to Noxious weeds (Salt cedar) Leads to Invasive vegetation (Burdock)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Length: 0.55 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Rock Hounding
Modes of Transportation	UTV ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high Within 150 feet of Cryptobiotic soil
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Barren Crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In WHB Herd Management Area In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high In, crosses Erosive soil - High potential / saline soils Crosses Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.24 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Rock Hounding
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial Crosses Mixed Sagebrush Shrubland In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area Within 1/4 Mile of WHB Herd Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - Moderate potential In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar) In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or man

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Rock Hounding
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Low potential Crosses Erosive soil - Moderate potential In PFYC Class 5 - Very high
Resource Issues	Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Rock Hounding
	Camping
Modes of Transportation	UTV
	ATV
	Stock 4 Wheel Drive
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 5 - Very high Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 150 feet of Cryptobiotic soil Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.55 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Allotment Fence
	Gate
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland In, crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area Within 1/4 Mile of WHB Herd Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 5 - Very high Within 150 feet of Cryptobiotic soil Crosses Erosive soil - Moderate potential In Erosive soil - Low potential Leads to Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential In Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Rock Hounding
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential
Resource Issues	Leads to Noxious weeds (Salt cedar) In Invasive vegetation (Burdock; Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/16/2020

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.55 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In, crosses Erosive soil - Moderate potential In Erosive soil - High potential / saline soils
Resource Issues	Crosses, Within 150 feet of Cryptobiotic soil Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Due to the low traffic volume and low speeds expected, allowing continued use of this route would contribute to the overall route network minimizing the potential for harassment of wildlife.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Due to the low traffic volume and low speeds expected, allowing continued use of this route would contribute to the overall route network minimizing the potential for harassment of wildlife.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential
Resource Issues	Leads to, Within 1/4 mile of Noxious weeds (Salt cedar) Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jared Brogan, Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area In WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights R.S. 2477 claim
Range Facilities	Active Allotment Allotment Fence Cattleguard Gate Private Fence Pond/Dam/Reservoir Pipeline Tank/Trough
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Jurisdictional Access	State Lands or Park
Mineral Facilities	AML site

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Hunting
	Cultural / Historical Viewing
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area In ACEC - Area of Critical Environmental Concern
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim ROW - Road Water Rights
Range Facilities	Active Allotment Allotment Fence Private Fence
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping Hunting Cultural / Historical Viewing
Modes of Transportation	UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E) Crosses White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In Inventory Class IV In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to, crosses Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): Portions of this route were designated as closed in previous management efforts.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim ROW - Road Water Rights
Range Facilities	Active Allotment Allotment Fence Private Fence
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping Hunting Cultural / Historical Viewing
Modes of Transportation	UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E) Crosses White-tailed prairie dog modeled habitat (S)

Misc. Resources	In, crosses Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to, crosses Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Memo(s): Portions of this route are not designated in the RMP.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: XXXX

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.32 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Medium
Route Type(s):	Connector; Spur		
Surface:	Graveled; Bladed		
Origin:	None identified by IDT	Maintained:	Regularly by County
Jurisdictions:	BLM; Private	Constructed:	None identified by IDT

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Agency Facilities	Recreation Site
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Private Fence
	Allotment Fence
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Parking Area - Developed
Activities	Interpretive Site
	Vehicle Exploring
	Camping
	Photography
	Cultural / Historical Viewing
Modes of Transportation	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Barren Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ACEC - Area of Critical Environmental Concern
Water Resources	Within 100 meters of Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/16/2020

Evaluators: Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Nate Packer , NEPA Coordinator Myron Jeffs , Outdoor Recreation Specialist Bryan Torgerson , Resource Specialist	Michael Knight , GIS Specialist Stephanie Bauer , Range Specialist Jerrad Goodell , Aquatic Ecologist Marc Johnson , Natural Resource Specialist Natalie Fewings , Archaeologist Kris Carambelas , Archaeologist
---	---

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.34 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	Bladed		
Origin:	None identified by IDT	Maintained:	Minimally by Permittee
Jurisdictions:	BLM	Constructed:	None identified by IDT

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ACEC - Area of Critical Environmental Concern
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 3.48 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Spur; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
	Campsite - Undeveloped
Activities	Vehicle Exploring
	Sightseeing
	Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In, crosses Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Leads to Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils Crosses Erosive soil - Low potential Leads to Steep slopes Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/16/2020

Evaluators: Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Nate Packer , NEPA Coordinator Natalie Fewings , Archaeologist Kris Carambelas , Archaeologist	Michael Knight , GIS Specialist Stephanie Bauer , Range Specialist Jerrad Goodell , Aquatic Ecologist Marc Johson , Natural Resource Specialist Bryan Torgerson , Resource Specialist Blake Baker , Outdoor Rec Planner
---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.63 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Sightseeing
	Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In, crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Leads to Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In, crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)
