- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

--	--

TMA:	San Rafael Swell TMA	Route Name:	Co D 5037
Management Zone:	Limestone Cliffs Route Network Geographic Area	Class:	Primitive Road
Length: 2.73 mi.	Width: Dual Track	Use Level:	Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Agency Facilities	Monitoring Site
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Livestock Watering Access
	Livestock Trailing
	Pond/Dam/Reservoir
	Allotment Fence
	Gate

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Lease Facilities	ROW - Other (Ditches, canals)

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
	Photography
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial Leads to, Within 1/4 mile of Desert bighorn substantial year-long Within 1/2 mile of Raptor nest (non-TES) Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In PFYC Class 2 - Low In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 1.58 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Lease Facilities	ROW - Other (Ditches, canals)
Range Facilities	Pond/Dam/Reservoir
	Livestock Watering Access

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial In Desert bighorn substantial year-long Within 1/4 mile of Elk winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class II In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 1.14 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial In Desert bighorn substantial year-long Within 1/4 mile of Elk winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In, crosses Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season.

The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Tooter Ogden , Sevier County Commissioner

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.64 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Livestock Trailing
	Pond/Dam/Reservoir
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial In Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Tooter Ogden , Sevier County Commissioner

TMA:	San Rafael Swell TMA	Route Name:	Co D 5041
Management Zone:	Limestone Cliffs Route Network Geographic Area	Class:	Primitive Road
Length: 2.95 mi.	Width: Dual Track	Use Level:	Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Agency Facilities	Monitoring Site
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Livestock Trailing
	Pond/Dam/Reservoir
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial In Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil Crosses Erosive soil - High potential / saline soils
Resource Issues	In Erosive soil - Low potential Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: LIMITED This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.</p>
<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial In Pinyon-Juniper Woodland In Barren In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial In Desert bighorn substantial year-long Within 1/2 mile of Raptor nest (non-TES)
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses, Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential Leads to, Within 50 feet of Steep slopes

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pipeline

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.61 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Range Facilities	Active Allotment
	Private Fence
	Other (Erosion control structure (Tank Canyon erosion))

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Mule deer winter crucial Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.67 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Gate
	Pasture Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Mule deer winter crucial Within 1/4 mile of Black bear year-long substantial In Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In, Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Low potential Crosses Erosive soil - Moderate potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (West end of route) In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Other (Erosion control structure)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.24 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Corral
	Ranch HQ / Building
	Livestock Watering Access
	Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial Within 1/4 mile of Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long In Elk winter crucial Within 1/2 mile of Raptor nest (non-TES)
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In PFYC Class 2 - Low In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Adam Robison , New User	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator Rebecca Anderson , Geologist

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.13 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Range Facilities	Active Allotment
	Private Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Lease Facilities	Water Rights (Clark's Reservoir)
Range Facilities	Tank/Trough
	Livestock Watering Access
	Mineral Supplement Location
	Pond/Dam/Reservoir
	Gate

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter crucial Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In, Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.53 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Loop		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS6055 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter crucial Within 1/4 mile of Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (South end of route) In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage. Allowing continued use of this existing route, which provides access to the ditch, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.73 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Other (Erosion control structures)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Mule deer winter crucial Within 1/4 mile of Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (North end of route) In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage. For purposes of minimizing damage to public lands with BLM-inventoried wilderness characteristics in the evaluation of this route, BLM considered the potential for damage to wilderness characteristics, including naturalness, outstanding opportunities for solitude, and outstanding opportunities for primitive and unconfined recreation, for each alternative route network.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Mule deer winter crucial In Black bear year-long substantial In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area In, Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited to Designated Routes</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Rat67: By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Pond/Dam/Reservoir

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Mule deer winter crucial In Black bear year-long substantial In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	In PFYC Class 2 - Low Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Adam Robison , New User	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator Rebecca Anderson , Geologist
--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 1.58 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park Private Lands
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment Gate Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Sightseeing Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utle, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. 10/31/02023 M. Utle, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In Barren In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Mule deer winter crucial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Pronghorn year-long crucial habitat In Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil (Midway along route) In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Last Chance Rd
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area	Class:	Primitive Road
Length: 5.67 mi.	Width: Dual Track	Use Level:	Medium
Route Type(s):	Connector		
Surface:	Graveled; Bladed	Maintained:	Regularly by Sevier County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class B 6000. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
	ROW - Road
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Livestock Trailing
	Livestock Watering Access
	Monitoring Site
	Pipeline
Mineral Facilities	Community pit
	Free use pit

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
Range Facilities	Corral
	Pond/Dam/Reservoir
	Spring Development
	Exclosure Fence
	Gate
	Livestock Watering Access
	Mineral Supplement Location
	Monitoring Site
	Pipeline
	Tank/Trough

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Hunting
	Photography
	Sightseeing
	Antler Shed Hunting
	Hiking
	Cultural / Historical Viewing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Backpacking
	Bicycling / Mountain Biking
Modes of Transportation	Bicycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area and connects to the Copper Globe Lone Tree Network areas. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Mule deer winter crucial In Black bear year-long substantial Within 1/4 mile of Pronghorn year-long crucial habitat In Desert bighorn substantial year-long Crosses Migratory bird high-value habitat Within 1/2 mile of Raptor nest (non-TES)
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Cretzfeldt-flower (<i>Cryptantha creutzfeldtii</i>) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification In VRM Class III - Partially Retain existing char. In VRM Class II - Retain existing character In Inventory Class II In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Within 200 meters of Spring In Riparian
Misc. Resources	In PFYC Class 3 - Moderate In, crosses, Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils In Fugitive dust - High potential Within 50 feet of Steep slopes In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently

managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to the gravel pit, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

---	--

TMA:	San Rafael Swell TMA	Route Name:	Willow Springs Overlook
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area	Class:	Primitive Road
Length: 1.86 mi.	Width: Dual Track	Use Level:	Medium
Route Type(s):	Connector		
Surface:	Graveled; Bladed	Maintained:	Regularly by BLM; Sevier County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class B 6002.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim (Claimed to County line)
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Tank/Trough
	Water Haul Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
Activities	Sightseeing Backpacking Photography Hiking
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area and connects to the Copper Globe Lone Tree Network areas. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Mule deer winter crucial In Black bear year-long substantial Within 1/2 mile of Raptor nest (non-TES)
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils In Fugitive dust - High potential In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to the vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to the vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree and connects to the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial Within 1/4 mile of Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1/4 mile of Mule deer winter crucial Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Camping
	Sightseeing
	Cultural / Historical Viewing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to Yellow-billed cuckoo potential habitat (T)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applicati

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to historic features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to historic features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Camping
	Sightseeing
	Cultural / Historical Viewing
	Equestrian
Modes of Transportation	Hiking
	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Yellow-billed cuckoo potential habitat (T)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Corral
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Yellow-billed cuckoo potential habitat (T)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In Erosive soil - High potential / saline soils In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA: San Rafael Swell TMA

Management Zone: Fremont Junction Route Network Geographic Area

Length: 0.13 mi.

Width: Dual Track

Class: Primitive Road

Use Level: Low

Route Type(s):

Spur; Loop

Surface:

None identified by IDT

Maintained: Minimally by County

Origin:

None identified by IDT

Constructed: None identified by IDT

Jurisdictions:

BLM

Additional Information: County Class D.

General Evaluation Questions

Does this route:

- either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? **YES**
- provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? **YES**
- provide a principal means of connectivity within a Travel Management Area or Management Zone? **NO**
- exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? **YES**
- provide an important linkage between Travel Management Areas or Management Zones? **NO**

Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws? **YES**

Might the continued use of this route potentially impact:

- State or Federal special status species or their habitat? **YES**
- cultural or any other specially-protected resources or objects identified in Agency planning documents? **YES**
- any special area designations, e.g., National Monuments? **YES**
- any other resources of concern? **YES**

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated? **YES**

Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources? **NO**

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial Within 1/2 mile of Raptor nest (non-TES)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial Within 1/2 mile of Raptor nest (non-TES) Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (Midway along route)
Resource Issues	Leads to Steep slopes In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.1 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Loop		
Surface:	None identified by IDT	Maintained: Minimally by County	
Origin:	None identified by IDT	Constructed: None identified by IDT	
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Sightseeing Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	Leads to, Within 50 feet of Steep slopes In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to vistas, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to vistas, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to vistas, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Copper Globe/Lone Tree Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS4515, SS4521, SS4532, SS4537, SS4557, SS4572, SS4573, SS4575, SS4580, SS5001, SS5002, SS5010, SS5012, SS5050, SS5051, SS5069, SS5087, SS6078, SS6079, SS6089

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.29 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Sightseeing Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (45273): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: XXXX

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (45273): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: XXXX

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (45273): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: XXXX

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Natural Rehab

Memo(s): IDT review of how this designation addresses the designation criteria (45273): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Sightseeing Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Copper Globe/Lone Tree Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS4515, SS4521, SS4532, SS4537, SS4557, SS4572, SS4573, SS4575, SS4580, SS5001, SS5002, SS5010, SS5012, SS5050, SS5051, SS5069, SS5087, SS6078, SS6079, SS6089, SS6090

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland In, crosses Barren In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area. Closed

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.07 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur; Loop		
Surface:	None identified by IDT	Maintained: Minimally	
Origin:	None identified by IDT	Constructed: None identified by IDT	
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Livestock Watering Access
	Livestock Trailing
	Water Haul Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 3 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim (On Sevier side)
	Water Rights
Range Facilities	Active Allotment
	Livestock Watering Access
	Livestock Trailing
	Water Haul Site
	Pond/Dam/Reservoir
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat Crosses, Within 1/4 mile of Mule deer winter crucial
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification In VRM Class II - Retain existing character In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.64 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained: Minimally by County	
Origin:	None identified by IDT	Constructed: None identified by IDT	
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
	Hunting
	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In Barren Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil (Toward east end) Leads to Steep slopes
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 1.4 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Range Facilities	Active Allotment
	Livestock Trailing
Mineral Facilities	Mining claim
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
Lease Facilities	Water Rights
Range Facilities	Pond/Dam/Reservoir
	Livestock Watering Access

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
	Hunting
	Sightseeing
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species an

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Photography
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Desert Saltbush In Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In Erosive soil - High potential / saline soils In, crosses, Within 50 feet of Steep slopes
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.35 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained: Minimally by County	
Origin:	None identified by IDT	Constructed: None identified by IDT	
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	Leads to Migratory bird high-value habitat In Inventory Class IV
Special Management Areas	In VRM Class III - Partially Retain existing char. In ERMA - Extensive Recreation Management Area
Misc. Resources	In Lands w/ Wilderness Character In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Resource Issues	In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. By closing the route, the potential for future impacts to documented wilderness character would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.26 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained: Minimally by County	
Origin:	None identified by IDT	Constructed: None identified by IDT	
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil
Resource Issues	Leads to Steep slopes Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Other (Seep)
	Monitoring Site
	Livestock Trailing
	Livestock Watering Access
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Activities	Camping Hunting
Modes of Transportation	UTV ATV Motorcycle Stock 4 Wheel Drive

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p> <p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B	
	<p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p> <p><u>Specific Designation Criteria Addressed and Relevant to Route Issues:</u></p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability. • 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats. <p><u>How Designation Addresses Criteria Above:</u> Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.</p> <p><u>Designation Criteria Addressed but Not Relevant to Route Issues:</u> (no known conflicts among users or no known resource concerns to minimize for)</p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (c) • 43 CFR § 8342.1 (d) <p><u>Closure Method(s):</u> Sign Closed, Natural rehabilitation</p> <p><u>Memo(s):</u> IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.</p>

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applicati

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.18 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained: Minimally by County	
Origin:	None identified by IDT	Constructed: None identified by IDT	
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class II - Retain existing character
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/23/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS6078 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Range Facilities	Active Allotment
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Barren Crosses Mixed Blackbrush/Sand Shrubland In Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial Crosses, Within 1800 feet of Migratory bird high-value habitat Leads to Mule deer winter crucial
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Water Resources	Within 200 meters of Spring In Riparian
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Free use pit (Locked gate)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Allowing continued use of this existing route, which provides access to a free use pit, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Allowing continued use of this existing route, which provides access to a free use pit, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.33 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
	Pipeline
	Exclosure Fence
	Other (Erosion control structures)
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
Jurisdictional Access	State Lands or Park

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
Activities	Vehicle Exploring Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
Activities	Camping

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial Leads to Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	In Riparian
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p> <p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>
Alternative B	
	<p>Designation per 43 CFR § 8342.1: CLOSED This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p> <p>Specific Designation Criteria Addressed and Relevant to Route Issues:</p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability. • 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats. <p>How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.</p> <p>Designation Criteria Addressed but Not Relevant to Route Issues: (no known conflicts among users or no known resource concerns to minimize for)</p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (c) • 43 CFR § 8342.1 (d) <p>Closure Method(s): Sign Closed, Natural rehabilitation</p> <p>Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.</p>

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 1.36 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
	Pipeline
	Other (Erosion control structures)
	Spring Development
	Pasture Fence
	Tank/Trough
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. This route provides the only access to the tunnel under I-70 and accesses trails outside the TMA. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	In Riparian
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applicati

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to an I-70 underpass, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to an I-70 underpass, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 1 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	NO
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Range Facilities	Active Allotment
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
	Other (Erosion control structures)
	Spring Development
	Pasture Fence
	Pipeline
	Tank/Trough
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
None identified by IDT	

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter crucial In Black bear year-long substantial In Mule deer winter crucial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	In Riparian
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A	(Current Management, No Action Alternative)
Area Designation: Limited

<p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
--

<p>Alternative B</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p> <p><u>Specific Designation Criteria Addressed and Relevant to Route Issues:</u></p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability. • 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats. <p><u>How Designation Addresses Criteria Above:</u> Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.</p> <p><u>Designation Criteria Addressed but Not Relevant to Route Issues:</u> <i>(no known conflicts among users or no known resource concerns to minimize for)</i></p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (c) • 43 CFR § 8342.1 (d) <p><u>Closure Method(s):</u> Sign Closed, Natural rehabilitation</p> <p><u>Memo(s):</u> IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.</p>
--

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Copper Globe/Lone Tree Route Network Geographic Area		
Length: 0.28 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route: <ul style="list-style-type: none"> • either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? • provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? • provide a principal means of connectivity within a Travel Management Area or Management Zone? • exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? • provide an important linkage between Travel Management Areas or Management Zones? 	YES YES NO YES NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact: <ul style="list-style-type: none"> • State or Federal special status species or their habitat? • cultural or any other specially-protected resources or objects identified in Agency planning documents? • any special area designations, e.g., National Monuments? • any other resources of concern? 	YES YES YES YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access <i>(leads directly to the listed jurisdiction or facility, and IS the main route used for access)</i>	
Type	Description
Range Facilities	Active Allotment
Alternate Access <i>(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)</i>	
Type	Description
None identified by IDT	
Link Access <i>(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)</i>	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial
	Within 1/4 mile of Elk winter crucial
VRM/RSC	In VRM Class II - Retain existing character
	In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
	In Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential
	In Erosive soil - High potential / saline soils
	In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:
Limited

<p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
--

<p>Alternative B</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p> <p><u>Specific Designation Criteria Addressed and Relevant to Route Issues:</u></p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability. • 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats. <p><u>How Designation Addresses Criteria Above:</u> Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.</p> <p><u>Designation Criteria Addressed but Not Relevant to Route Issues:</u> <i>(no known conflicts among users or no known resource concerns to minimize for)</i></p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (c) • 43 CFR § 8342.1 (d) <p><u>Closure Method(s):</u> Sign Closed, Natural rehabilitation</p> <p><u>Memo(s):</u> IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.</p>

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route: <ul style="list-style-type: none"> • either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? • provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? • provide a principal means of connectivity within a Travel Management Area or Management Zone? • exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? • provide an important linkage between Travel Management Areas or Management Zones? 	<p>YES</p> <p>YES</p> <p>NO</p> <p>YES</p> <p>NO</p>
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	<p>YES</p>
Might the continued use of this route potentially impact: <ul style="list-style-type: none"> • State or Federal special status species or their habitat? • cultural or any other specially-protected resources or objects identified in Agency planning documents? • any special area designations, e.g., National Monuments? • any other resources of concern? 	<p>YES</p> <p>YES</p> <p>YES</p> <p>YES</p>
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	<p>YES</p>
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	<p>NO</p>

Evaluation Information

Commercial, Administrative, Property and Economics	
<p>The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.</p>	
Primary Access <i>(leads directly to the listed jurisdiction or facility, and IS the main route used for access)</i>	
Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
Mineral Facilities	Mining claim
Alternate Access <i>(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)</i>	
Type	Description
None identified by IDT	
Link Access <i>(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)</i>	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Copper Globe/Lone Tree Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter crucial Leads to Migratory bird high-value habitat Within 1/4 mile of Mule deer year-long substantial habitat Within 1/4 mile of Pronghorn year-long crucial habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 1.87 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Tank/Trough
	Water Haul Site
	Livestock Watering Access
	Livestock Trailing
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Antler Shed Hunting
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter crucial Within 1/4 mile of Desert bighorn substantial year-long In Mule deer winter crucial
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In, crosses Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low Leads to Steep slopes

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
	Hunting
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter crucial Within 1/4 mile of Desert bighorn substantial year-long In Mule deer winter crucial
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (South end) In Erosive soil - High potential / saline soils Leads to Steep slopes In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.1 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Loop		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter crucial In Mule deer winter crucial
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (South end) In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:

- either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency? **YES**
- provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility? **YES**
- provide a principal means of connectivity within a Travel Management Area or Management Zone? **NO**
- exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset? **YES**
- provide an important linkage between Travel Management Areas or Management Zones? **NO**

Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws? **YES**

Might the continued use of this route potentially impact:

- State or Federal special status species or their habitat? **YES**
- cultural or any other specially-protected resources or objects identified in Agency planning documents? **YES**
- any special area designations, e.g., National Monuments? **YES**
- any other resources of concern? **YES**

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated? **YES**

Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources? **NO**

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)

VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Highway 72
Management Zone:	Hwy 72 Route Network Geographic Area	Class:	Road
Length: 9.16 mi.	Width: Multi Lane	Use Level:	Low
Route Type(s):	Principal Feeder	Maintained:	Regularly by State
Surface:	Paved	Constructed:	None identified by IDT
Origin:	None identified by IDT		
Jurisdictions:	BLM; USFS		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District
Lease Facilities	ROW - Road
Range Facilities	Active Allotment
	Pipeline
	Allotment Fence
	Cattleguard
	Corral
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Tank/Trough
	Monitoring Site
	Water Haul Site
	Pond/Dam/Reservoir
	Gate
	Livestock Trailing
	Livestock Watering Access

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Hunting
	Sightseeing
	Antler Shed Hunting
	Bicycling / Mountain Biking
	Woodcutting
	Fishing
Modes of Transportation	Stock 4 Wheel Drive
	Motorcycle
	2WD vehicle
	Bicycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
	Backpacking
	Pine-nut Picking
	Wildlife Watching
Modes of Transportation	By Foot
	Modified 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Christmas Tree Cutting - Personal Use
Modes of Transportation	UTV
	ATV

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland Crosses Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In, crosses Black bear year-long substantial In Mule deer winter crucial In, crosses Black bear year-long crucial Within 1/4 mile of Desert bighorn substantial year-long Within 1/4 mile of Mule deer summer crucial In Elk winter substantial Within 1/2 mile of Raptor nest (non-TES)
Special Status Plants	In Mussentuchit gilia (Aliciella tenuis)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character Within 1 mile of National Historic Trail (Old Spanish NHT)
Water Resources	In Riparian
Misc. Resources	In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (North end; Moss at high elevation) In, crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Within 50 feet of Steep slopes In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive; Musk thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Highway 76
Management Zone:	Ivie Creek Frontage Road Route Network Geographic Area	Class:	Road
Length: 1.68 mi.	Width: Multi Lane	Use Level:	High
Route Type(s):	Principal Feeder	Maintained:	Regularly by State
Surface:	Paved	Constructed:	None identified by IDT
Origin:	None identified by IDT		
Jurisdictions:	BLM; USFS		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Jurisdictional Access	FS Adjacent Ranger District
Lease Facilities	ROW - Road
Range Facilities	Active Allotment
	Livestock Trailing
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	Motorcycle
	2WD vehicle
	Modified 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Antler Shed Hunting
	Backpacking
	Bicycling / Mountain Biking
	Fishing
	Woodcutting
Modes of Transportation	By Foot
	Bicycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	UTV
	ATV

General Memo(s): IDT review of this route's purpose and need (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This road is the Ivie Creek Frontage Road. It is an paved road.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long In Elk winter substantial
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT)
Misc. Resources	In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Sightseeing
	Antler Shed Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long In Elk winter substantial Within 1/4 mile of Black bear year-long crucial
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT)
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Tansy mustard; Blue mustard)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applicati

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 6.45 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
	Monitoring Site
	Water Haul Site
	Tank/Trough
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Antler Shed Hunting
	Photography
	Sightseeing
Modes of Transportation	By Horse
	Bicycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Desert Saltbush Crosses Barren In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Desert bighorn substantial year-long In Elk winter substantial Crosses Migratory bird high-value habitat
Special Status Plants	In Cretuzfeldt-flower (<i>Cryptantha creutzfeldtii</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification In Inventory Class III In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT) Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In, crosses Erosive soil - Low potential In, crosses Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Antler Shed Hunting
Modes of Transportation	By Horse

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT)
Water Resources	In Riparian Within 200 meters of Spring
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 2 - Low In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Blue mustard)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Rat43: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for undue and unnecessary soil erosion, habitat disruption, vegetative damage and impacts to cultural resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT)
Water Resources	In Riparian Within 200 meters of Spring
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential
Resource Issues	Crosses, Within 150 feet of Cryptobiotic soil In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Blue mustard) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT)
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Blue mustard)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applicati

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Vehicle Exploring

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1 mile of National Historic Trail (Old Spanish NHT)
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.35 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur; Loop		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Vehicle Exploring

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil (East end of route) In Erosive soil - Low potential In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.12 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS6123 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/ 31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/ 31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/ 31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/ 31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Water Haul Site
	Livestock Watering Access
	Livestock Trailing
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Barren In Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

	Sightseeing
	Antler Shed Hunting
Modes of Transportation	Motorcycle
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Mixed Mountain Forest/Woodland In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Leads to Migratory bird high-value habitat
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Within 200 meters of Spring In Riparian
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential Crosses, Within 150 feet of Cryptobiotic soil Crosses, Within 50 feet of Steep slopes In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Memo(s): Portions of this route were designated as closed in previous management efforts.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.8 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Sightseeing
	Antler Shed Hunting
Modes of Transportation	Motorcycle
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Mountain Forest/Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long
VRM/RSC	Leads to Migratory bird high-value habitat In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In, Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, leads to, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil Within 50 feet of Steep slopes In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Sightseeing
	Antler Shed Hunting
Modes of Transportation	Motorcycle
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush In Mixed Mountain Forest/Woodland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1/2 mile of Raptor nest (non-TES)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Water Resources	Within 200 meters of Spring In Riparian
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil Within 50 feet of Steep slopes Crosses Erosive soil - Low potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited to Designated Routes</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
<p>Memo(s): Portions of this route are not designated in the RMP.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. By closing the route, the potential for future impacts to documented wilderness character would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.09 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Hunting Antler Shed Hunting
Modes of Transportation	Motorcycle UTV ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial
	In Mule deer winter crucial
	In Elk winter substantial
	In Desert bighorn substantial year-long
VRM/RSC	In VRM Class IV - Major Modification
	In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
	In Lands w/ Wilderness Character
Water Resources	In, Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential
	Within 150 feet of Cryptobiotic soil
	In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA	Route Name:	County D 5179
Management Zone:	Fremont Junction Route Network Geographic Area	Class:	Primitive Road
Length: 2.18 mi.	Width: Dual Track	Use Level:	Low
Route Type(s):	Connector	Maintained:	Minimally by County
Surface:	None identified by IDT	Constructed:	None identified by IDT
Origin:	Mining		
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Livestock Trailing
	Pipeline
	Livestock Watering Access
	Mineral Supplement Location
	Monitoring Site
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Jurisdictional Access	State Lands or Park

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Camping
	Sightseeing
	Equestrian
Modes of Transportation	Motorcycle
	Stock 4 Wheel Drive
	UTV
	ATV
	2WD vehicle
	By Horse

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
None identified by IDT	

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland Crosses Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (East end of route) In PFYC Class 2 - Low In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 1.2 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	Mining	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Livestock Trailing
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Pond/Dam/Reservoir
	Livestock Watering Access
	Mineral Supplement Location
	Pipeline

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Sightseeing
	Equestrian
Modes of Transportation	Motorcycle
	UTV
	ATV
	By Horse

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Mountain Forest/Woodland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In, crosses Erosive soil - High potential / saline soils Crosses Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round. The limit is applied to this route because of Elk; Mule deer seasonal range.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

How Designation Addresses Criteria Above: By limiting vehicle width to UTV width or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Livestock Trailing
	Livestock Watering Access
	Tank/Trough
	Pipeline
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Sightseeing
	Equestrian
	Camping
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Sightseeing
	Equestrian
	Camping
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil (North end)
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Hunting Antler Shed Hunting Sightseeing Equestrian Camping
Modes of Transportation	Motorcycle UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Treatment
	Pipeline
	Tank/Trough
	Mineral Supplement Location
	Livestock Watering Access
	Livestock Trailing
	Allotment Fence
	Gate
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Equestrian
	Camping
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Leads to Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.11 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Hunting Antler Shed Hunting Equestrian Camping
Modes of Transportation	Motorcycle UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. .

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Equestrian
	Camping
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Livestock Trailing
	Livestock Watering Access
	Pond/Dam/Reservoir
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Camping
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland Crosses Mixed Sagebrush Shrubland Crosses Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial Leads to Migratory bird high-value habitat
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.52 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Livestock Trailing
	Livestock Watering Access
	Allotment Fence
	Gate
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Camping
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/2023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.83 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Livestock Trailing
	Livestock Watering Access
	Allotment Fence
	Gate
	Treatment
	Corral

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Jurisdictional Access	Private Lands

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Camping
	Antler Shed Hunting
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Equestrian
Modes of Transportation	2WD vehicle
	By Horse

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Mountain Forest/Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial In Black bear year-long substantial
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	County D 5009
Management Zone:	Fremont Junction Route Network Geographic Area	Class:	Primitive Road
Length: 2.27 mi.	Width: Dual Track	Use Level:	Medium
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Allotment Fence
	Pond/Dam/Reservoir
	Monitoring Site
	Livestock Trailing
	Livestock Watering Access
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Camping
	Antler Shed Hunting
Modes of Transportation	Motorcycle
	UTV
	ATV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Equestrian
Modes of Transportation	2WD vehicle
	By Horse

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Mountain Forest/Woodland In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Crosses Black bear year-long substantial
VRM/RSC	In Inventory Class II In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	County D 5008
Management Zone:	Fremont Junction Route Network Geographic Area	Class:	Primitive Road
Length: 0.89 mi.	Width: Dual Track	Use Level:	Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.81 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS6119 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Hunting Antler Shed Hunting Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland Crosses Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Hunting Antler Shed Hunting Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Misc. Resources	In PFYC Class 2 - Low
	In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)
	In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial
	In Elk winter substantial
	In Desert bighorn substantial year-long
	In Black bear year-long crucial
	Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 2 - Low
	In Erosive soil - Low potential
	In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial
	In Elk winter substantial
	In Desert bighorn substantial year-long
	In Black bear year-long crucial
	Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
	Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low
	In Erosive soil - Low potential
	In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.41 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS6150 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Range Facilities	Active Allotment Treatment Allotment Fence
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
Range Facilities	Pond/Dam/Reservoir

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Hunting Antler Shed Hunting
Modes of Transportation	UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.14 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS6150 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Range Facilities	Active Allotment
	Treatment
	Allotment Fence
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
None identified by IDT	

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial
	In Elk winter substantial
	In Desert bighorn substantial year-long
	In Black bear year-long crucial
	Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
	Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low
	In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> LIMITED This route was designated limited as part of a planning and NEPA process. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.</p>

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment
	Corral

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.1 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this primitive route would not adversely affect wilderness values because the route surfacing is durable and the route is located in an environmentally preferable location.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Livestock Watering Access
	Livestock Trailing
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
------	-------------

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Antler Shed Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this primitive route would not adversely affect wilderness values because the route surfacing is durable and the route is located in an environmentally preferable location.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this primitive route would not adversely affect wilderness values because the route surfacing is durable and the route is located in an environmentally preferable location. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Treatment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial Crosses Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long substantial Within 1/4 mile of Black bear year-long crucial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long substantial Within 1/4 mile of Black bear year-long crucial Crosses, Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Water Resources	In Riparian
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 1.01 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; USFS		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM. Route is open on USFS.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Livestock Watering Access
	Livestock Trailing
	Exclosure Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Antler Shed Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Mountain Forest/Woodland Crosses Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long substantial Within 1/4 mile of Black bear year-long crucial Crosses, Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	In Riparian Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In, crosses Erosive soil - High potential / saline soils In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Public safety issue (Multiple washouts)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Desert bighorn substantial year-long In Black bear year-long substantial Within 1/4 mile of Black bear year-long crucial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area In, Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	In Riparian
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential Crosses, Within 50 feet of Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Public safety issue (Washouts)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.1 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Black bear year-long substantial Within 1/4 mile of Black bear year-long crucial Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Desert bighorn substantial year-long
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use minimizes the potential for route proliferation on public land. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use minimizes the potential for route proliferation on public land. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route to OHV use minimizes the potential for route proliferation on public land. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.09 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Allotment Fence
	Treatment
	Gate
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Black bear year-long crucial In Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	Crosses Erosive soil - High potential / saline soils In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Length: 0.56 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Treatment
	Gate
	Livestock Trailing
	Pasture Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial In Black bear year-long crucial In Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS6119 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Treatment
	Gate
	Livestock Trailing
	Pasture Fence
	Tank/Trough
	Livestock Watering Access
	Pipeline

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long In Black bear year-long crucial Within 1/4 mile of Black bear year-long substantial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Antler Shed Hunting
Modes of Transportation	UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial
	In Elk winter substantial
	Within 1/4 mile of Desert bighorn substantial year-long
	Within 1/4 mile of Black bear year-long crucial
	In Black bear year-long substantial
	Within 1/4 mile of Mule deer summer crucial
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential
	In PFYC Class 2 - Low
	In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)
	In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Rat24: Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Rat35: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Rat36: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Rat39: Closing this route would enhance wildlife habitat by eliminating motorized use and removing the route footprint. Rat40: Rat41: Closing this route would enhance wildlife movement by reducing fragmentation. Rat42: Closing this route would eliminate motorized use, minimizing the potential for harassment of wildlife. Rat83: By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.38 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; USFS		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Range Facilities	Active Allotment
	Allotment Fence
	Gate
	Pasture Fence
	Livestock Trailing
	Treatment

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
Jurisdictional Access	FS Adjacent Ranger District

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Activities	Antler Shed Hunting

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utle, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial Within 1/4 mile of Mule deer summer crucial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pasture Fence
	Treatment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
	Pipeline

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial
	In Elk winter substantial
	Within 1/4 mile of Desert bighorn substantial year-long
	Within 1/4 mile of Black bear year-long crucial
	In Black bear year-long substantial
	Within 1/4 mile of Mule deer summer crucial
	Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In VRM Class III - Partially Retain existing char.
	In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential
	In PFYC Class 2 - Low
	In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pasture Fence
	Treatment
	Pond/Dam/Reservoir
	Livestock Trailing
	Livestock Watering Access
	Pipeline

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Hunting
	Camping
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat Leads to Mule deer summer crucial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.36 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; USFS		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pasture Fence
	Treatment
	Livestock Trailing
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Freemont Junction Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Mixed Mountain Forest/Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial Within 1/4 mile of Mule deer summer crucial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Fremont Junction Route Network Geographic Area		
Length: 0.5 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; USFS		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM. Route is open on USFS.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pasture Fence
	Treatment
	Livestock Trailing
	Gate
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utle, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Freemont Junction Network Area. The following routes make up the critical network connectivity for this area. SS6078, SS6079, SS6093, SS6110, SS6119, SS6121, SS6123, SS6145 SS6150, SS6151, SS6193.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer winter crucial In Elk winter substantial Within 1/4 mile of Black bear year-long crucial In Black bear year-long substantial Within 1/4 mile of Mule deer summer crucial
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to USFS lands, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to USFS lands, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to USFS lands, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Derek Givens

Initial Evaluation Date: 2/14/2024

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Jason Anderson , GIS Specialist Myron Jeffs , Outdoor Recreation Specialist Adam Robison , New User	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Rebecca Anderson , Geologist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician
--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Sids Mountain/Wikiup Route Network Geographic Area		
Length: 0.82 mi.	Width: Dual Track	Class: Wilderness Inventory	Use Level: Medium Road
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Allotment Fence
	Gate
	Pond/Dam/Reservoir
	Mineral Supplement Location
	Livestock Watering Access
	Tank/Trough
	Water Haul Site
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Spring Development

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Hunting
	Photography
	OHV Destination Route
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Sids Mountain/Wikiup Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In, crosses Mixed Sagebrush Shrubland In, crosses Mixed Desert Saltbush In Barren In, crosses Pinyon-Juniper Woodland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Leads to Yellow-billed cuckoo potential habitat (T) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Desert bighorn sheep high-value year-long Within 1/4 mile of Desert bighorn sheep crucial year-long habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Maguire's daisy (<i>Erigeron maguirei</i>)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II In Inventory Class III In Inventory Class I In VRM Class I - Preserve existing character In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area Within 1/4 Mile of Statutory Wilderness
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	Within 1/4 mile of Invasive vegetation (<i>Halogeton</i> ; Russian thistle) Leads to Noxious weeds (<i>Salt cedar</i>)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. The route crosses or is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Closing this route, along with natural reclamation, would reduce visual contrast created by the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).
