Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 9/16/2020

Evaluators: Kegen Benson , Biologist Veronica Kratman , Realty Specialist Jim Jennings , Public Lands Administrator Nate Packer , NEPA Coordinator Natalie Fewings , Archaeologist Kris Carambelas , Archaeologist	Michael Knight , GIS Specialist Stephanie Bauer , Range Specialist Jerrad Goodell , Aquatic Ecologist Marc Johson , Natural Resource Specialist Bryan Torgerson , Resource Specialist Blake Baker , Outdoor Rec Planner
---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.27 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Braided		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Leads to Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil Crosses Erosive soil - Low potential In Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to w

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Due to the low traffic volume and low speeds expected, allowing continued use of this route would contribute to the overall route network minimizing the potential for harassment of wildlife. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Leads to White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Leads to Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses, Within 150 feet of Cryptobiotic soil Crosses Erosive soil - Low potential In Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

VRM/RSC	In VRM Class IV - Major Modification In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 2 - Low In PFYC Class 3 - Moderate In, crosses, Within 150 feet of Cryptobiotic soil Crosses Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

---	--

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.29 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Private Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands (Hits fence at private)

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 750 feet of White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 2 - Low Crosses, Within 150 feet of Cryptobiotic soil
Resource Issues	In Erosive soil - Moderate potential In, leads to, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 3.52 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
Mineral Facilities	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
	Campsite - Undeveloped
Activities	Vehicle Exploring
	Sightseeing
	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial In, crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential In Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p><u>Memo(s):</u> Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/6/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
	Campsite - Undeveloped
Activities	Vehicle Exploring
	Sightseeing
	Camping
	Photography
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial In Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Leads to Steep slopes Crosses Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.27 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Sagebrush Shrubland In Mixed Desert Saltbush In, crosses Pinyon-Juniper Woodland In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Crosses Wash
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p><u>Memo(s):</u> Portions of this route are not designated in the RMP.</p>

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.62 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	Within 150 feet of Cryptobiotic soil (West end of route) In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass (west end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland Crosses Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In, crosses Pinyon-Juniper Woodland In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.04 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Y Intersection		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In, crosses Pinyon-Juniper Woodland In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.49 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Crosses Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/28/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.06 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
Mineral Facilities	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat In Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Route proliferation Leads to Mine hazard Leads to, crosses Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of streams have immediate impacts to water quality with each vehicle crossing.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Livestock Watering Access
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland In, crosses Mixed Desert Saltbush In, crosses Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Southwestern willow flycatcher potential habitat (E) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Migratory bird high-value habitat Crosses Fisheries (sport & native)
Special Status Plants VRM/RSC	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Crosses Perennial stream In, crosses Intermittent stream Crosses Riparian
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Route proliferation In Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.13 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Route proliferation Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial In, crosses Pinyon-Juniper Woodland Crosses Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - Moderate potential Crosses Erosive soil - Low potential Leads to Steep slopes
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Within 750 feet of White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Pronghorn year-long crucial habitat
VRM/RSC	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential Crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In PFYC Class 2 - Low In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.41 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Private Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
	In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat
	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III
	In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil
	In PFYC Class 3 - Moderate
	In Erosive soil - High potential / saline soils
	In, crosses Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)
	Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.04 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In, crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.06 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Loop		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In PFYC Class 2 - Low
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.12 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur; Y Intersection		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	NO
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.15 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	NO
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Misc. Resources	In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing use of this existing route, which provides access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Length: 0.3 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Y Intersection		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Road
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by provi

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Powerline
	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial Crosses Barren Crosses Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat Within 1/4 mile of Mule deer year-long substantial habitat Crosses Fisheries (sport & native)
Special Status Plants VRM/RSC	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In VRM Class III - Partially Retain existing char. In Inventory Class IV
Water Resources	Within 100 meters of Intermittent stream Crosses Floodplain Crosses Perennial stream Crosses Riparian Crosses Wash
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In, crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. The route crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. The route crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Leads to Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Millers Canyon Rd
Management Zone:	Miller Canyon Route Network Geographic Area		
Length: 5.15 mi.	Width: Multi Lane	Class: Road	Use Level: High
Route Type(s):	Principal Feeder		
Surface:	Paved	Maintained:	Regularly by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private; State Land		

Additional Information: County Class B 912. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	Private Lands State Lands or Park
Lease Facilities	Water Rights R.S. 2477 claim
Range Facilities	Active Allotment Allotment Fence Cattleguard Gate Private Fence Livestock Trailing Livestock Watering Access Mineral Supplement Location
Mineral Facilities	Mining claim AML site

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Parking Area - Undeveloped
Activities	Sightseeing Photography Cultural / Historical Viewing
Modes of Transportation	Stock 4 Wheel Drive 2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Camping Hunting
Modes of Transportation	UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Barren In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In, crosses Other - Wash, Intermittent, Perennial In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 100 meters of Fisheries (sport & native)
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	Within 1/4 Mile of SRMA - Special Recreation Management Area Leads to, Within 1/4 Mile of WHB Herd Area Leads to, Within 1/4 Mile of WHB Herd Management Area
Water Resources	Within 100 meters of Floodplain Within 100 meters of Perennial stream Within 100 meters of Intermittent stream Within 100 meters of Riparian
Misc. Resources	Crosses Wash In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	Leads to Mine hazard Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Red Point Spur Rd
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.37 mi.	Width: Multi Lane	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	Graveled; Bladed	Maintained:	Regularly by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class B 918.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Livestock Watering Access
	Other (Pump location)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Photography
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In, crosses Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Leads to Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III In Inventory Class II
Special Management Areas	Within 1/4 Mile of SRMA - Special Recreation Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In, crosses Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Leads to, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.03 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Livestock Watering Access
	Other (Pump location)

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Photography
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 100 meters of Fisheries (sport & native) In Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Water Resources	Within 100 meters of Floodplain Within 100 meters of Perennial stream Within 100 meters of Riparian Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential
Resource Issues	In, leads to Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In, leads to Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate m

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS5317 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping Photography Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In PFYC Class 2 - Low In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Memo(s): Portions of this route were designated as closed in previous management efforts.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS5317 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C**Designation per 43 CFR § 8342.1:**

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D**Designation per 43 CFR § 8342.1:**

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Muddy Spur Rd
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.28 mi.	Width: Multi Lane	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	Graveled; Bladed	Maintained:	Regularly by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class B 917.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Livestock Watering Access
	Private Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Jurisdictional Access	Private Lands

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	2WD vehicle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.91 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	Bladed		
Origin:	None identified by IDT	Maintained:	Minimally by County
Jurisdictions:	BLM; Private	Constructed:	None identified by IDT

Additional Information: County Class B 917 Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Range Facilities	Active Allotment
	Livestock Watering Access
	Private Fence
	Pond/Dam/Reservoir
Mineral Facilities	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	Motorcycle
	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) Crosses, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Crosses, Within 1800 feet of Migratory bird high-value habitat Crosses Fisheries (sport & native)
Special Status Plants VRM/RSC	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In, leads to WHB Herd Area In, leads to WHB Herd Management Area
Water Resources	Crosses Wash Crosses Floodplain Crosses Perennial stream Crosses Intermittent stream Crosses Riparian
Misc. Resources	In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil (East end of route) In PFYC Class 3 - Moderate In PFYC Class 5 - Very high
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) Leads to Mine hazard

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.5 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Allotment Fence Livestock Trailing Pond/Dam/Reservoir Gate Livestock Watering Access
Mineral Facilities	AML site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	UTV ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Photography
Modes of Transportation	Motorcycle Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren Crosses Pinyon-Juniper Woodland Crosses Mixed Blackbrush/Sand Shrubland In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In SRMA - Special Recreation Management Area In, leads to WHB Herd Area In, leads to WHB Herd Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	Within 150 feet of Cryptobiotic soil (North end of route) In PFYC Class 5 - Very high In, crosses Erosive soil - Moderate potential In Erosive soil - High potential / saline soils In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive) Leads to Mine hazard

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 3.58 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Jurisdictional Access	State Lands or Park

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Pinyon-Juniper Woodland In Barren In, crosses Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Crosses Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The route may be used to access certified water right recorded with the State of Utah. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/21/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 2.24 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Pond/Dam/Reservoir

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush In, crosses Barren Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Crosses Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Low potential In, crosses Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.7 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Mixed Desert Saltbush In Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Crosses Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 5 - Very high In Erosive soil - Low potential Crosses Erosive soil - Moderate potential Crosses Cryptobiotic soil
Resource Issues	Leads to, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.31 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS5317 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Private Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area
Water Resources	Crosses Wash
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Range Facilities	Active Allotment
	Private Fence
	Gate

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	2WD vehicle

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.05 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 100 meters of Fisheries (sport & native) In Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses Wash Within 100 meters of Floodplain Within 100 meters of Perennial stream Within 100 meters of Riparian
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Private Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area
Water Resources	Crosses, Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential Crosses Cryptobiotic soil Crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Allotment Fence
	Gate
	Exclosure Fence
Mineral Facilities	Mine - Active

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Pond/Dam/Reservoir
	Mineral Supplement Location

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle
	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III In Inventory Class IV In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. Access to mining claims would be handled at the time of notice. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 2.19 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Braided		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Exclosure Fence Pond/Dam/Reservoir Tank/Trough Water Haul Site
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Mineral Supplement Location

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route, along with natural reclamation, would reduce visual contrast created by the route. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.23 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS5338 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	Crosses Erosive soil - Low potential Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.06 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Pond/Dam/Reservoir Water Haul Site
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class B 915. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	ROW - Powerline R.S. 2477 claim
Range Facilities	Active Allotment Allotment Fence Cattleguard Gate Exclosure Fence Tank/Trough Mineral Supplement Location Monitoring Site Water Haul Site Pond/Dam/Reservoir

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
Mineral Facilities	Mining claim

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive 2WD vehicle

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Modes of Transportation	UTV ATV

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil Crosses PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.5 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Regularly by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	ROW - Powerline
	ROW - Road (Access road)
Range Facilities	Active Allotment
	Exclosure Fence
	Tank/Trough
	Mineral Supplement Location
	Water Haul Site
Mineral Facilities	Pond/Dam/Reservoir
	Mining claim

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Modes of Transportation	UTV
	ATV

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is one of the primary access routes in the Coal Cliffs Route Network Geographic Area. The following routes make up the critical network connectivity for this area: SS5196, SS5186, SS5187, SS5201, SS5208, SS5209, SS5216, SS5241, SS5242, SS5242A, SS5243, SS5245, SS5246, SS5254, SS5257, SS5284, SS5317, SS5318, SS5324, SS5343, SS5344

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren In, crosses Other - Wash, Intermittent, Perennial In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Crosses Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Powerline ROW - Road (Access road) ROW - Telephone / Comm Site ROW - Other (Fiberoptic)
Range Facilities	Active Allotment Water Haul Site Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring Camping
Modes of Transportation	UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In, crosses Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.25 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur; Y Intersection		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping
Modes of Transportation	UTV ATV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low In Erosive soil - Low potential Leads to Steep slopes Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass (north end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial In, crosses Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Length: 0.08 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In PFYC Class 3 - Moderate In, Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.9 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped Vista
Activities	Vehicle Exploring Camping
Modes of Transportation	UTV ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland In, crosses Pinyon-Juniper Woodland Crosses Mixed Blackbrush/Sand Shrubland In Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland Crosses Mixed Blackbrush/Sand Shrubland Crosses Barren
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants VRM/RSC	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential
Resource Issues	Leads to, crosses, Within 50 feet of Steep slopes In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. The route crosses or is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Other - Wash, Intermittent, Perennial In Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil (On east end) In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils In, crosses Erosive soil - Low potential Leads to, crosses, Within 50 feet of Steep slopes
Resource Issues	In, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In, crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Desert Saltbush
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential
Resource Issues	In, leads to, crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) In, leads to, crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/7/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, J Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate Leads to, crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential Leads to Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.1 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In PFYC Class 3 - Moderate Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Road
Range Facilities	Active Allotment
	Water Haul Site
	Tank/Trough
	Monitoring Site
	Exclosure Fence
	Pond/Dam/Reservoir
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.15 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
Modes of Transportation	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland
Special Status Animals	In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) In Fringed myotis modeled habitat (S) In White-tailed prairie dog modeled habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils Leads to Steep slopes
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Initial Evaluation Date: 10/19/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator David Halverson , Legal Counsel Rebecca Anderson , Geologist	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Scott Bartlett , Resource Specialist Jaydon Mead , Recreation Technician
--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.57 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	NO
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In White-tailed prairie dog modeled habitat (S)
	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
	Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III
	In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
	Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate
	In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 10/19/2020

Evaluators:

Michael Knight , GIS Specialist	Jerrad Goodell , Aquatic Ecologist
Kegen Benson , Biologist	Natalie Fewings , Archaeologist
Veronica Kratman , Realty Specialist	Stephanie Bauer , Range Specialist
Nate Packer , NEPA Coordinator	Jim Jennings , Public Lands Administrator
David Halverson , Legal Counsel	Scott Bartlett , Resource Specialist
Rebecca Anderson , Geologist	Jaydon Mead , Recreation Technician

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 1.38 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Y Intersection		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
	Private Lands
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Mule deer year-long substantial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Barren Crosses Pinyon-Juniper Woodland Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Other - Wash, Intermittent, Perennial In Mixed Sagebrush Shrubland
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - High potential / saline soils In, crosses Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.13 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	YES
Route SS5372 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Cheatgrass; Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

	In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate
	In, crosses Erosive soil - Moderate potential
	In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Monarch butterfly potential habitat (S)
	In White-tailed prairie dog modeled habitat (S)
	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III
	In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate
	In, crosses Erosive soil - Moderate potential
	In Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 10/19/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator David Halverson , Legal Counsel Rebecca Anderson , Geologist	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Scott Bartlett , Resource Specialist Jaydon Mead , Recreation Technician

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.23 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Erosive soil - High potential / saline soils
Resource Issues	Crosses, Within 150 feet of Cryptobiotic soil Crosses, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Powerline
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Monarch butterfly potential habitat (S)
	In White-tailed prairie dog modeled habitat (S)
	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III
	In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
	Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate
	In, crosses Erosive soil - Moderate potential
	Within 150 feet of Cryptobiotic soil
	Crosses Erosive soil - High potential / saline soils
	In Erosive soil - Low potential
Resource Issues	In, leads to Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Initial Evaluation Date: 10/19/2020

Evaluators:

Michael Knight , GIS Specialist	Jerrad Goodell , Aquatic Ecologist
Kegen Benson , Biologist	Natalie Fewings , Archaeologist
Veronica Kratman , Realty Specialist	Stephanie Bauer , Range Specialist
Nate Packer , NEPA Coordinator	Jim Jennings , Public Lands Administrator
David Halverson , Legal Counsel	Scott Bartlett , Resource Specialist
Rebecca Anderson , Geologist	Jaydon Mead , Recreation Technician

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.17 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Allotment Fence

Type	Description
Jurisdictional Access	Private Lands

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
	In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Monarch butterfly potential habitat (S)
	In White-tailed prairie dog modeled habitat (S)
	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat
	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III
	In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream
	Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential
	In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland Crosses Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat Leads to Raptor nest (non-TES)
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (Northeast branch) In PFYC Class 3 - Moderate
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p> <p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Initial Evaluation Date: 10/19/2020

Evaluators:

Michael Knight , GIS Specialist	Jerrad Goodell , Aquatic Ecologist
Kegen Benson , Biologist	Natalie Fewings , Archaeologist
Veronica Kratman , Realty Specialist	Stephanie Bauer , Range Specialist
Nate Packer , NEPA Coordinator	Jim Jennings , Public Lands Administrator
David Halverson , Legal Counsel	Scott Bartlett , Resource Specialist
Rebecca Anderson , Geologist	Jaydon Mead , Recreation Technician

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 0.81 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

General Memo(s): IDT review of this route's purpose and need (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Monarch butterfly potential habitat (S) In White-tailed prairie dog modeled habitat (S) In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S)
Managed Species	In Mule deer year-long substantial habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class II - Retain existing character In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: The low traffic volume and low speeds that characterize the overall use of this route would reduce the potential for continued use of the route to impact documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Coal Cliffs Route Network Geographic Area		
Length: 2.36 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment
	Allotment Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	Stock 4 Wheel Drive
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Hunting

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In Barren In, crosses Mixed Sagebrush Shrubland Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses White-tailed prairie dog modeled habitat (S) In Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat In Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class II In VRM Class II - Retain existing character In VRM Class I - Preserve existing character In Inventory Class III
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In WHB Herd Management Area In Lands w/ Wilderness Character In, Within 1/4 Mile of ACEC - Area of Critical Environmental Concern
Water Resources	In Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Low potential In PFYC Class 3 - Moderate In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil (North end of route) In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	In Noxious weeds (Salt cedar) In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By limiting motorized access on this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive plant species. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	ROW - Road
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Hunting
Modes of Transportation	ATV
	Motorcycle
	Stock 4 Wheel Drive
	UTV

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep crucial year-long habitat In Desert bighorn sheep high-value year-long
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class II In VRM Class I - Preserve existing character
Special Management Areas	In SRMA - Special Recreation Management Area In WHB Herd Area In ACEC - Area of Critical Environmental Concern Within 1/4 Mile of WHB Herd Management Area
Water Resources	Within 100 meters of Wash Within 100 meters of Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Moderate potential In Cryptobiotic soil
Resource Issues	In, crosses Erosive soil - High potential / saline soils In, Within 1/4 mile of Noxious weeds (Salt cedar) In, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route, along with natural reclamation, would reduce visual contrast created by the route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 10/19/2020

Evaluators:

Michael Knight , GIS Specialist	Jerrad Goodell , Aquatic Ecologist
Kegen Benson , Biologist	Natalie Fewings , Archaeologist
Veronica Kratman , Realty Specialist	Stephanie Bauer , Range Specialist
Nate Packer , NEPA Coordinator	Jim Jennings , Public Lands Administrator
David Halverson , Legal Counsel	Scott Bartlett , Resource Specialist
Rebecca Anderson , Geologist	Jaydon Mead , Recreation Technician

TMA:	San Rafael Swell TMA	Route Name:	I-70
Management Zone:	Interstate 70 Route Network Geographic Area		
Length: 97.46 mi.	Width: Multi Lane	Class:	Road
Route Type(s):	Principal Feeder		Use Level: High
Surface:	Paved	Maintained:	Minimally by UDOT
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park Private Lands BLM Adjacent FO DO or SO
Agency Facilities	Monitoring Site Recreation Site
Lease Facilities	ROW - Road ROW - Other (Salt sheds; Interpretive panels) ROW - Mineral Materials Site
Range Facilities	Active Allotment Allotment Fence Cattleguard Corral Pond/Dam/Reservoir Spring Development Exclosure Fence Gate Livestock Trailing Livestock Watering Access Mineral Supplement Location Monitoring Site Pasture Fence Private Fence Pipeline Ranch HQ / Building Tank/Trough Treatment Water Haul Site Well/Windmill

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Lease Facilities	Water Rights
Mineral Facilities	Mining claim Community pit Free use pit

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
	Vista
	Campsite - Designated
	Campground - Developed
	Interpretive Site
	Parking Area - Developed
	Parking Area - Undeveloped
	Recreation Fee Area
	Trailhead
Activities	Camping
	Vehicle Exploring
	OHV Destination Route
	Photography
	Sightseeing
	Backpacking
	Bicycling / Mountain Biking
	Canyoneering
	Bouldering
	Cultural / Historical Viewing
	Equestrian
	Geocaching
	Hiking
	River Rafting/Floating
	Rock Climbing
	Rock Crawling
	Rock Hounding
	Scientific Exploration
	Trail Running
Modes of Transportation	Wildlife Watching
	2WD vehicle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is part of the Coal Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	<p>In, crosses Mixed Blackbrush/Sand Shrubland</p> <p>In, crosses Mixed Desert Saltbush</p> <p>In, crosses Mixed Sagebrush Shrubland</p> <p>In, crosses Pinyon-Juniper Woodland</p> <p>In, crosses Other - Wash, Intermittent, Perennial</p> <p>In, crosses Barren</p> <p>Crosses Mixed Mountain Forest/Woodland</p>
Special Status Animals	<p>Crosses, Within 750 feet of White-tailed prairie dog modeled habitat (S)</p> <p>In, crosses, Within 100 meters of Fringed myotis modeled habitat (S)</p> <p>In, crosses, Within 100 meters of Spotted bat modeled habitat (S)</p> <p>In, crosses, Within 100 meters of Townsend's big-eared bat modeled habitat (S)</p> <p>Crosses, Within 1800 feet of Southwestern willow flycatcher potential habitat (E)</p> <p>Crosses, Within 1800 feet of Yellow-billed cuckoo potential habitat (T)</p> <p>In, crosses, Within 100 meters of Western bumble bee potential habitat (S)</p> <p>In, crosses, Within 100 meters of Monarch butterfly potential habitat (S)</p>
Managed Species	<p>Crosses, Within 1/4 mile of Desert bighorn sheep crucial year-long habitat</p> <p>Crosses, Within 1/4 mile of Desert bighorn sheep high-value year-long</p> <p>Crosses, Within 1800 feet of Migratory bird high-value habitat</p> <p>Crosses, Within 1/4 mile of Mule deer year-long substantial habitat</p> <p>Crosses, Within 1/4 mile of Pronghorn year-long crucial habitat</p> <p>Crosses, Within 1/4 mile of Pronghorn year-long substantial habitat</p> <p>Within 100 meters of Fisheries (sport & native)</p>
Special Status Plants	<p>Crosses, Within 300 feet of Bolander's camissonia (<i>Camissonia bolanderi</i>) (S)</p> <p>Crosses, Within 300 feet of Entrada rushpink (<i>Lygodesmia grandiflora</i> var <i>entrada</i>) (S)</p> <p>Crosses, Within 300 feet of Flat Top buckwheat, Smith's wild buckwheat (<i>Eriogonum corymbosum</i> var <i>smithii</i>) (S)</p> <p>Crosses, Within 300 feet of Maguire's daisy (<i>Erigeron maguirei</i>)</p> <p>Crosses, Within 300 feet of Mussentuchit gilia (<i>Aliciella tenuis</i>)</p> <p>Crosses, Within 300 feet of Utah spurge (<i>Euphorbia nephradenia</i>) (S)</p> <p>Crosses, Within 300 feet of Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)</p>
VRM/RSC	<p>In VRM Class I - Preserve existing character</p> <p>In VRM Class III - Partially Retain existing char.</p> <p>In VRM Class II - Retain existing character</p> <p>In Inventory Class II</p> <p>In Inventory Class I</p> <p>In Inventory Class III</p>
Special Management Areas	<p>In, crosses ACEC - Area of Critical Environmental Concern</p> <p>Within 1/4 mile of Lands w/ Wilderness Character</p> <p>In, crosses SRMA - Special Recreation Management Area</p> <p>In, crosses San Rafael Swell Recreation Area</p> <p>Within 1/4 Mile of Statutory Wilderness</p> <p>In, crosses ERMA - Extensive Recreation Management Area</p> <p>In, leads to, crosses WHB Herd Area</p> <p>In, leads to, crosses WHB Herd Management Area</p>
Water Resources	<p>Crosses Floodplain</p> <p>Within 100 meters of Perennial stream</p> <p>Crosses Ephemeral stream</p> <p>Crosses Intermittent stream</p> <p>Crosses Riparian</p> <p>Crosses Wash</p>
Misc. Resources	<p>In, crosses Erosive soil - High potential / saline soils</p> <p>In, crosses Erosive soil - Moderate potential</p> <p>In, crosses Erosive soil - Low potential</p>

Resource Issues	<p>Crosses, Within 150 feet of Cryptobiotic soil</p> <p>Crosses, Within 50 feet of Steep slopes</p> <p>Crosses PFYC Class 2 - Low</p> <p>Crosses PFYC Class 3 - Moderate</p> <p>Crosses PFYC Class 4 - High</p> <p>Crosses PFYC Class 5 - Very high</p> <p>Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass; Burdock)</p> <p>Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive; Musk thistle; Russian knapweed)</p> <p><i>Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.</i></p>
-----------------	---

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u></p> <p>Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u></p> <p>OPEN</p> <p>This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to vistas, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to vistas, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to vistas, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
	R.S. 2477 claim
Range Facilities	Active Allotment
	Pond/Dam/Reservoir
	Exclosure Fence
	Gate
	Mineral Supplement Location
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Vista
Activities	Vehicle Exploring
	Hunting
	Hiking
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Barren In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush Crosses Pinyon-Juniper Woodland Crosses Mixed Mountain Forest/Woodland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II In Inventory Class III
Special Management Areas	Within 1/4 Mile of Statutory Wilderness Within 1/4 Mile of SRMA - Special Recreation Management Area Within 1/4 mile of San Rafael Swell Recreation Area In ERMA - Extensive Recreation Management Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Low potential In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils (South end of route is in.) Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 1 - Very low In PFYC Class 3 - Moderate Leads to Steep slopes
Resource Issues	In, crosses Invasive vegetation (Halogeton; Russian thistle) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p>Area Designation: Limited</p> <p>Designation per 43 CFR § 8342.1: OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p>Memo(s): Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. By providing a designated route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to a vista, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 10/19/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Scott Bartlett , Resource Specialist Jaydon Mead , Recreation Technician	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Rebecca Anderson , Geologist Kris Carambelas , Archaeologist
--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.14 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Barren In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Leads to Migratory bird high-value habitat
Special Status Plants	In Mussentuchit gilia (<i>Aliciella tenuis</i>) In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Utah spurge (<i>Euphorbia nephradenia</i>) (S)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	Within 1/4 Mile of Statutory Wilderness In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash Within 200 meters of Spring
Misc. Resources	In Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Leads to Steep slopes
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or man

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	NO
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	NO
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	BLM Adjacent FO DO or SO
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Well/Windmill
	Pond/Dam/Reservoir
	Mineral Supplement Location
	Allotment Fence
	Cattleguard

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Camping
	Vehicle Exploring
	Hunting
	Hiking
	Geocaching
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
	Sightseeing
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial Crosses Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	Crosses Migratory bird high-value habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char. In Inventory Class III In Inventory Class II
Special Management Areas	Within 1/4 Mile of Statutory Wilderness Within 1/4 Mile of SRMA - Special Recreation Management Area In ERMA - Extensive Recreation Management Area Within 1/4 Mile of National Park
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In, crosses Erosive soil - Low potential In, crosses Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	In, Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a well-designed and constructed route that reduces the inclination to travel off-trail, the potential for damage to wildlife habitats would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.19 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	NO
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Mineral Facilities	Oil/Gas Lease

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	Crosses Migratory bird high-value habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	Within 1/4 Mile of Statutory Wilderness In ERMA - Extensive Recreation Management Area
Water Resources	In Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) In, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 2.62 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	Bladed	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Other (Drift fence)
Mineral Facilities	Oil/Gas Lease

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Barren In, crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland In, crosses Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	Within 1/4 Mile of Statutory Wilderness In ERMA - Extensive Recreation Management Area Leads to, Within 1/4 Mile of WHB Herd Area
Water Resources	Crosses Intermittent stream Crosses Wash
Misc. Resources	In Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil (Middle of route.) In, crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. The route crosses or is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 2.34 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	Water Rights
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Other (Drift fence)

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Mineral Facilities	Oil/Gas Lease

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial Crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Southwestern willow flycatcher potential habitat (E) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Migratory bird high-value habitat In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area In WHB Herd Area
Water Resources	In Intermittent stream Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. The route crosses or is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 10/19/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Scott Bartlett , Resource Specialist Jaydon Mead , Recreation Technician	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Rebecca Anderson , Geologist Kris Carambelas , Archaeologist

TMA:	San Rafael Swell TMA	Route Name:	Last Chance Cutoff
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 7.75 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	Bladed	Maintained:	Regularly by Emery County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class B 925.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights ROW - Road R.S. 2477 claim
Range Facilities	Active Allotment Allotment Fence Cattleguard Exclosure Fence (Vegetation) Pond/Dam/Reservoir Pipeline Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Blackbrush/Sand Shrubland In, crosses Mixed Desert Saltbush In Mixed Sagebrush Shrubland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) Crosses, Within 1800 feet of Southwestern willow flycatcher potential habitat (E) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Crosses, Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) Within 300 feet of Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In WHB Herd Area In SRMA - Special Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The route may be used to access certified water right recorded with the State of Utah. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. The ROW for this route is the determining document with regard to a route designation. The REP carries forward the ROW decision and the data is used for cumulative effects analysis in the NEPA process for the Travel Management Plan.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.14 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Loop		
Surface:	Bladed	Maintained:	Regularly by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: Old alignment of County Class B 925. Re-routed because of wash-out.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) Within 300 feet of Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In WHB Herd Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Within 100 meters of Intermittent stream
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass) Crosses Noxious weeds (Salt cedar) In Public safety issue (Wash out)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing the route to OHV use would promote of safety of all users of public land by eliminating access to an area with known hazards where mitigation is not feasible.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing the route to OHV use would promote of safety of all users of public land by eliminating access to an area with known hazards where mitigation is not feasible.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing the route to OHV use would promote of safety of all users of public land by eliminating access to an area with known hazards where mitigation is not feasible.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.82 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS5395 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Mineral Supplement Location

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	UTV
	ATV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Other - Wash, Intermittent, Perennial In, crosses Mixed Desert Saltbush Crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) Crosses Southwestern willow flycatcher potential habitat (E) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char. In Inventory Class III
Special Management Areas	In WHB Herd Area Within 1/4 mile of Lands w/ Wilderness Character In SRMA - Special Recreation Management Area
Water Resources	Crosses Intermittent stream
Misc. Resources	In, crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil Crosses Erosive soil - Low potential In PFYC Class 2 - Low In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass) Crosses, Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motor

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 3.42 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS5391 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Water Rights
Range Facilities	Active Allotment
Mineral Facilities	Oil/Gas Lease

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial In, crosses Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of WHB Herd Area
Water Resources	In Intermittent stream Within 100 meters of Wash Within 200 meters of Spring (Spring/seep)
Misc. Resources	In, crosses Erosive soil - Moderate potential In PFYC Class 3 - Moderate In, crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass) In Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

LIMITED

Public use of this route is limited to transportation type. The public may use this route by Less than 66" vehicle width, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. By limiting this route to 66" or less, larger vehicles would be prevented from adding to surface impacts and route widening. Additionally, the potential for conflicts between users of different vehicle types would be reduced. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and vegetative damage.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Limiting this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. The route may be used to access certified water right recorded with the State of Utah.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Cryptobiotic soil
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 10/19/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Scott Bartlett , Resource Specialist Jaydon Mead , Recreation Technician	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Rebecca Anderson , Geologist Kris Carambelas , Archaeologist

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.41 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS5393 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Mixed Blackbrush/Sand Shrubland In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Statutory Wilderness
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Special Management Areas	In ERMA - Extensive Recreation Management Area
Water Resources	Within 100 meters of Intermittent stream Within 100 meters of Wash
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Well/Windmill

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Statutory Wilderness
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than applica

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland In Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Statutory Wilderness
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) In Route proliferation

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route to OHV use minimizes the potential for route proliferation on public land.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Tank/Trough
	Pipeline
	Mineral Supplement Location
	Pond/Dam/Reservoir

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Vehicle Exploring
	Camping
	Hiking
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Blackbrush/Sand Shrubland Crosses Mixed Desert Saltbush In Barren Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Statutory Wilderness
Water Resources	Crosses Wash
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Allotment Fence
	Tank/Trough
	Cattleguard

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Camping
	Hiking
	Backpacking
	Bicycling / Mountain Biking
	Canyoneering
Modes of Transportation	Equestrian
	Geocaching
	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Mussentuchit/Lower Last Chance Route Network Area. The following routes make up the critical network connectivity for this area: SS5087, SS5127, SS5128, SS5129, SS5130, SS5131, SS5132, SS5136, SS5138, SS5139, SS5143, SS5145, SS5146, SS5147, SS5167, SS5168, SS5176, SS5389, SS5391, SS5395, SS5416.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	Crosses Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial In Mixed Sagebrush Shrubland Crosses Pinyon-Juniper Woodland In, crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat Within 1/4 mile of Desert bighorn sheep high-value year-long Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Statutory Wilderness Leads to National Park
Water Resources	Crosses Wash Crosses Intermittent stream
Misc. Resources	In PFYC Class 3 - Moderate Within 150 feet of Cryptobiotic soil In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.44 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Activities	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In Barren
Special Status Animals	In, crosses Mixed Blackbrush/Sand Shrubland In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Statutory Wilderness
Water Resources	Within 100 meters of Wash
Misc. Resources	In PFYC Class 3 - Moderate In, crosses, Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - Moderate potential In Erosive soil - High potential / saline soils
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton (east end of route))

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Oil Well Rd.
Management Zone:	Limestone Cliffs Route Network Geographic Area	Class:	Road
Length: 1.37 mi.	Width: Multi Lane	Use Level:	High
Route Type(s):	Principal Feeder	Maintained:	Regularly by Sevier County
Surface:	Graveled; Bladed	Constructed:	None identified by IDT
Origin:	None identified by IDT		
Jurisdictions:	BLM		

Additional Information: County Class B 6005.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	BLM Adjacent FO DO or SO
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Well/Windmill
	Pond/Dam/Reservoir
	Mineral Supplement Location
	Allotment Fence
	Cattleguard

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Camping Vehicle Exploring Hunting Hiking Geocaching
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography Sightseeing
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. These are accessed for hunting and highly scenic views and overlooks. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main access to the area, regularly maintained 2 lane

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Black bear year-long substantial In Desert bighorn substantial year-long In Elk winter substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of National Park Within 1/4 Mile of Natural Area
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In Fugitive dust - High potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/16/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Rebecca Anderson , Geologist Myron Jeffs , Outdoor Recreation Specialist	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Adam Robison , New User Braden Sheppard , Legal Counsel

TMA:	San Rafael Swell TMA	Route Name:	Upper Cathedral Valley
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 2.22 mi.	Width: Multi Lane	Class:	Road
Route Type(s):	Principal Feeder		Use Level: High
Surface:	Graveled; Bladed	Maintained:	Regularly by Sevier County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; NPS; Private		

Additional Information: County Class B 6006 Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	BLM Adjacent FO DO or SO Private Lands Other (NPS)
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment Pipeline Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Lease Facilities	Water Rights

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Camping Vehicle Exploring Hunting Hiking Geocaching
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography Sightseeing
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. These are accessed for hunting and highly scenic views and overlooks. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main access to the area, regularly maintained 2 lane

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	Crosses, Within 1/4 mile of Pronghorn year-long crucial habitat In Black bear year-long substantial Crosses, Within 1/4 mile of Elk winter substantial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Natural Area Leads to National Park
Misc. Resources	In Erosive soil - Low potential In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil In PFYC Class 2 - Low In PFYC Class 3 - Moderate In Fugitive dust - High potential
Resource Issues	Within 1/4 mile of Invasive vegetation (Russian thistle; Halogeton) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to the national park, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to the national park, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to the national park, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	YES
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District Private Lands State Lands or Park BLM Adjacent FO DO or SO
Lease Facilities	Water Rights
Range Facilities	Active Allotment Allotment Fence Cattleguard Pond/Dam/Reservoir Gate Livestock Trailing Livestock Watering Access Monitoring Site Pipeline Tank/Trough Water Haul Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Agency Facilities	Monitoring Site (Weather station)

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (*main route used to access the destinations or use activities listed*)

Type	Description
Activities	Camping Vehicle Exploring Photography Sightseeing
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses (*used to access the destinations or use activities listed, but not considered the main route*)

Type	Description
Activities	Hunting Bicycling / Mountain Biking Equestrian
Modes of Transportation	2WD vehicle Modified 4 Wheel Drive

Link Access / Infrequent Uses (*rarely used to access the destinations or use activities listed*)

Type	Description
Modes of Transportation	By Horse

General Memo(s): IDT review of this route's purpose and need (10/11/2023 -Jaydon Mead, Dana Truman, Mike Tweddell, Kyle Smith, Daniel Kauffman Stephanie Howard, Blake Baker): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. These are accessed for hunting and highly scenic views and overlooks. This route is on the boundary of the LWC an County B Road. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In, crosses Barren Crosses Mixed Blackbrush/Sand Shrubland Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Crosses Southwestern willow flycatcher potential habitat (E)
Managed Species	In Black bear year-long substantial In Mule deer winter crucial In Elk winter substantial In Elk winter crucial Within 1/4 mile of Pronghorn year-long crucial habitat Crosses Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class II - Retain existing character In VRM Class IV - Major Modification In Inventory Class II In Inventory Class III In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area Crosses Natural Area Within 1/4 mile of Lands w/ Wilderness Character
Water Resources	Crosses Perennial stream In Riparian
Misc. Resources	In PFYC Class 2 - Low In PFYC Class 3 - Moderate In PFYC Class 5 - Very high In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Crosses, Within 150 feet of Cryptobiotic soil In Fugitive dust - High potential
Resource Issues	Crosses, Within 1/4 mile of Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar; Russian olive; Phragmites)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Report generated on 6/2/2024

Copyright © 2024 by ARS, Inc. All rights reserved. No part of this publication may be reproduced, distributed, or transmitted in any form or by any means, including photocopying, recording, or other electronic or mechanical methods, without the prior written permission of the publisher, except in the case of brief quotations embodied in critical reviews and certain other noncommercial uses permitted by copyright law.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Memo(s): IDT review of how this designation addresses the designation criteria (10/11/2023 -Jaydon Mead, Dana Truman, Mike Tweddell, Kyle Smith, Daniel Kauffman Stephanie Howard, Blake Baker): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Memo(s): IDT review of how this designation addresses the designation criteria (10/11/2023 -Jaydon Mead, Dana Truman, Mike Tweddell, Kyle Smith, Daniel Kauffman Stephanie Howard, Blake Baker): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Memo(s): IDT review of how this designation addresses the designation criteria (10/11/2023 -Jaydon Mead, Dana Truman, Mike Tweddell, Kyle Smith, Daniel Kauffman Stephanie Howard, Blake Baker): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Last Chance Cutoff
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.64 mi.	Width: Graded Track	Class: Road	Use Level: Medium
Route Type(s):	Connector		
Surface:	Bladed	Maintained:	Regularly by Sevier County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class B 6003.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	YES
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Allotment Fence
	Cattleguard
	Pond/Dam/Reservoir
	Pipeline
	Tank/Trough
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	UTV
	ATV
	Motorcycle
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Camping
Modes of Transportation	2WD vehicle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. These are accessed for hunting and highly scenic views and overlooks. Main connector road, 2 lanes, regularly maintained. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Pronghorn year-long crucial habitat In Elk winter substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class IV - Major Modification
Special Management Areas	Within 1/4 mile of Lands w/ Wilderness Character In ERMA - Extensive Recreation Management Area
Misc. Resources	Crosses Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - Low potential In PFYC Class 2 - Low In Fugitive dust - High potential
Resource Issues	In Invasive vegetation (Russian thistle; Halogeton; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/25/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith, Jared Brogan 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
NO	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Private Fence
	Ranch HQ / Building
	Gate
	Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are accessed for hunting and highly scenic views and overlooks. Primary access to the last chance ranch and private ground. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial Within 1/4 mile of Mule deer winter crucial Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential Crosses Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA	Route Name:	Last Chance Desert Spur
Management Zone:	Limestone Cliffs Route Network Geographic Area	Class:	Road
Length: 0.12 mi.	Width: Graded Track	Use Level:	Medium
Route Type(s):	Connector	Maintained:	Regularly by Sevier County
Surface:	Graveled; Bladed	Constructed:	None identified by IDT
Origin:	None identified by IDT		
Jurisdictions:	BLM; State Land		
Additional Information: County Class B 6009. Route designation applies only to those portions of the route located on public lands managed by BLM.			

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Pipeline
	Tank/Trough

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
	Vehicle Exploring
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6039, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. These are accessed for hunting and highly scenic views and overlooks. This is an bladed major road providing camping access on state ground. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Mule deer winter crucial In Pronghorn year-long crucial habitat In Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils Crosses Erosive soil - Low potential Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route. By providing a critical trail connection that would minimize the inclination to travel off-trail, potential impacts on T&E species and their habitats would be reduced. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class B road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Additional Information: County Class B 6009. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics	
The following items help to identify the <u>purpose and need</u> of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.	
Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)	
Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Livestock Trailing
	Livestock Watering Access
	Pipeline
	Tank/Trough
	Water Haul Site
Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)	
Type	Description
None identified by IDT	
Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)	
Type	Description
Mineral Facilities	Mining claim

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Activities	Photography
	Hunting
Modes of Transportation	Motorcycle

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
Activities	Camping

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Limestone Cliffs Route Network Geographic Area and leads to the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial
	In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV
	In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 2 - Low
	In PFYC Class 3 - Moderate
	In, crosses Erosive soil - Low potential
	In Erosive soil - Moderate potential
	In, crosses Erosive soil - High potential / saline soils
	Crosses, Within 150 feet of Cryptobiotic soil
Resource Issues	In, Within 1/4 mile of Invasive vegetation (<i>Halogeton</i> ; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)
<p>Area Designation: Limited to Designated Routes</p> <p>Designation per 43 CFR § 8342.1: CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
Alternative B
<p>Designation per 43 CFR § 8342.1: OPEN This route is open to all users, year-round.</p> <p>Specific Designation Criteria Addressed and Relevant to Route Issues:</p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability. • 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats. <p>How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.</p> <p>Designation Criteria Addressed but Not Relevant to Route Issues: (no known conflicts among users or no known resource concerns to minimize for)</p> <ul style="list-style-type: none"> • 43 CFR § 8342.1 (c) • 43 CFR § 8342.1 (d) <p>Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).</p>

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.52 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class B 6009. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment Pipeline Tank/Trough
Mineral Facilities	Mining claim

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting Photography
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area and leads to the Mussentuchit Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/16/2020

<p>Evaluators:</p> <p>Michael Knight, GIS Specialist Kegen Benson, Biologist Veronica Kratman, Realty Specialist Nate Packer, NEPA Coordinator Jason Anderson, GIS Specialist Brant Hallows, Soils Brandon Jolley, NEPA Planner Joelle McCarthy, Field Manager Michael Utley, Realty Specialist Michael Tweddell, Rangeland Management Specialist Sue Fivecoat, Assistant Field Manager Cindy Ledbetter, Environmental Coordinator</p>	<p>Jerrad Goodell, Aquatic Ecologist Natalie Fewings, Archaeologist Stephanie Bauer, Range Specialist Jim Jennings, Public Lands Administrator Mark Dean, Hydrology Austin Hiskey, Outdoor Recreation Planner Sam Marolt, Geologist Dustin Rooks, Botanist David Halverson, Legal Counsel Jaydon Mead, Recreation Technician Paul Caso, Range Specialist</p>
--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 1.38 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Allotment Fence
	Gate
	Livestock Trailing
	Livestock Watering Access
	Water Haul Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Mineral Facilities	Mining claim

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland Crosses Mixed Desert Saltbush In, crosses Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat Within 1/4 mile of Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle; Cheatgrass)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p><u>Memo(s):</u> Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.18 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D 5253. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Allotment Fence
	Gate
	Livestock Trailing
	Livestock Watering Access
	Water Haul Site
	Pond/Dam/Reservoir

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring
	Photography
	Sightseeing
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat Within 1/4 mile of Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential
Resource Issues	Crosses Erosive soil - High potential / saline soils In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat Within 1/4 mile of Black bear year-long substantial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Crosses Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Photography
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area and leads to the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In, crosses Other - Wash, Intermittent, Perennial Crosses Barren
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Southwestern willow flycatcher potential habitat (E)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E) In Mussentuchit gilia (<i>Aliciella tenuis</i>)
VRM/RSC	In VRM Class III - Partially Retain existing char. In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils Crosses Erosive soil - Low potential Crosses Cryptobiotic soil
Resource Issues	In PFYC Class 3 - Moderate In Invasive vegetation (Halogeton; Russian thistle) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 0.46 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access (leads directly to the listed jurisdiction or facility, and IS the main route used for access)

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Gate
	Livestock Trailing
	Livestock Watering Access
	Mineral Supplement Location
	Pasture Fence
	Pipeline
	Tank/Trough
Mineral Facilities	Mining claim

Alternate Access (leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)

Type	Description
None identified by IDT	

Link Access (does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses (main route used to access the destinations or use activities listed)

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses (used to access the destinations or use activities listed, but not considered the main route)

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses (rarely used to access the destinations or use activities listed)

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit Route Network Geographic Area and connects to the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Crosses Erosive soil - High potential / saline soils
Resource Issues	In Invasive vegetation (Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> CLOSED This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.</p>
	<p><u>Memo(s):</u> This route is within a previously designated Open Area.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on a less sensitive route capable of accommodating the volume of traffic anticipated for the route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Allowing continued use of this existing route, which provides the best access to active mining claims for maintenance and exploration, would minimize the potential for new disturbances to documented resources from cross-country travel or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

--	---

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 2.71 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; State Land		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	State Lands or Park
Range Facilities	Active Allotment
	Pipeline
	Livestock Trailing
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit Route Network Geographic Area and connects to the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Mixed Desert Saltbush In, crosses Mixed Sagebrush Shrubland Crosses Barren In, crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, leads to WHB Herd Area In PFYC Class 2 - Low In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Crosses Cryptobiotic soil (Where route hits ridge)
Resource Issues	In PFYC Class 3 - Moderate In Invasive vegetation (Russian thistle) Within 1/4 mile of Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Livestock Trailing
	Livestock Watering Access
	Pipeline
	Tank/Trough

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland Crosses Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat Leads to, Within 1/4 mile of Black bear year-long substantial Leads to, Within 1/4 mile of Mule deer winter crucial
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char. In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In, crosses Erosive soil - Moderate potential In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)	
	<p><u>Area Designation:</u> Limited</p> <p><u>Designation per 43 CFR § 8342.1:</u> OPEN This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.</p>
	<p><u>Memo(s):</u> Portions of this route were designated as closed in previous management efforts.</p>

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (11/29/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/16/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Tooter Ogden , Sevier County Commissioner
---	---

TMA:	San Rafael Swell TMA		
Management Zone:	Mussentuchit/Last Chance Route Network Geographic Area		
Length: 2.14 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Range Facilities	Pipeline
	Tank/Trough

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Hunting
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character In, leads to WHB Herd Area
Misc. Resources	In Erosive soil - Moderate potential In, crosses Erosive soil - Low potential Crosses Erosive soil - High potential / saline soils In PFYC Class 2 - Low Within 150 feet of Cryptobiotic soil (Midway along route)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route footprint. Closing this route would enhance wildlife movement by reducing fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Activities	Hunting
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Mussentuchit/Lower Last Chance Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Pronghorn year-long crucial habitat In Black bear year-long substantial
VRM/RSC	In Inventory Class IV In VRM Class III - Partially Retain existing char.
Special Management Areas	In ERMA - Extensive Recreation Management Area
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low Crosses Erosive soil - High potential / saline soils
Resource Issues	Leads to Invasive vegetation (Russian thistle) Leads to Noxious weeds (Salt cedar)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Memo(s): This route is within a previously designated Open Area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.67 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Loop		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; NPS		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
Jurisdictional Access	Other (NPS)

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Vehicle Exploring
	Hunting
	Photography

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

General Memo(s): IDT review of this route's purpose and need (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial Within 1/4 mile of Pronghorn year-long crucial habitat In Black bear year-long substantial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Natural Area Leads to National Park
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 2 - Low In Erosive soil - Low potential Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Because this route is reclaimed or currently reclaiming, officially closing the route will contribute to minimizing potential impacts to documented resources by eliminating motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (12/12/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

--	--

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.11 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Range Facilities	Active Allotment
	Spring Development
	Livestock Watering Access
	Pipeline

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	ATV
	Motorcycle
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In, crosses Other - Wash, Intermittent, Perennial In, crosses Mixed Sagebrush Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Yellow-billed cuckoo potential habitat (T)
Managed Species	In Elk winter substantial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character Within 1/4 Mile of Natural Area
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Low potential In Erosive soil - Moderate potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate m

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would provide the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative B, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Campsite - Undeveloped
Activities	Camping
Modes of Transportation	ATV
	Motorcycle
	UTV

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
	Sightseeing

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Black bear year-long substantial In Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Water Resources	In Riparian
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by eliminating motorized use and removing the route

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Pinyon-Juniper Woodland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S) Within 1800 feet of Yellow-billed cuckoo potential habitat (T)
Managed Species	In Elk winter substantial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class II - Retain existing character In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area In Natural Area
Misc. Resources	In PFYC Class 2 - Low In, crosses Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. This route provides access to State and/or private property and its use may or may not minimize potential impacts to documented resources. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

<p>Evaluators:</p> <p>Michael Knight, GIS Specialist Kegen Benson, Biologist Veronica Kratman, Realty Specialist Nate Packer, NEPA Coordinator Jason Anderson, GIS Specialist Brant Hallows, Soils Brandon Jolley, NEPA Planner Joelle McCarthy, Field Manager Michael Utley, Realty Specialist Michael Tweddell, Rangeland Management Specialist Sue Fivecoat, Assistant Field Manager Cindy Ledbetter, Environmental Coordinator</p>	<p>Jerrad Goodell, Aquatic Ecologist Natalie Fewings, Archaeologist Stephanie Bauer, Range Specialist Jim Jennings, Public Lands Administrator Mark Dean, Hydrology Austin Hiskey, Outdoor Recreation Planner Sam Marolt, Geologist Dustin Rooks, Botanist David Halverson, Legal Counsel Jaydon Mead, Recreation Technician Paul Caso, Range Specialist Tooter Ogden, Sevier County Commissioner</p>
--	--

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 1.79 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; NPS; Private		

Additional Information: County Class D. Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands Other (NPS)
Lease Facilities	R.S. 2477 claim
Range Facilities	Active Allotment Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV Motorcycle UTV Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography Sightseeing Hunting Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Elk winter substantial In Black bear year-long substantial Within 1800 feet of Migratory bird high-value habitat In Desert bighorn substantial year-long In Mule deer winter crucial
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Natural Area Within 1/4 mile of Lands w/ Wilderness Character Leads to National Park
Water Resources	In Wash
Misc. Resources	In PFYC Class 2 - Low In, crosses Erosive soil - Moderate potential Crosses, Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would minimize potential impacts to wildlife habitats by

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. The route is in close proximity to streams. Proximity of roads to streams changes watershed hydrology by increasing drainage density resulting in more extreme flooding and associated erosion and sedimentation. The probability of sedimentation into surface waters is also increased because of proximity of these routes to concentrated flow during flood events. The route frequently crosses a stream. Stream crossings destabilize stream banks and channels resulting in greater erosion and sedimentation during flood flow. Crossings of perennial streams have immediate impacts to water quality with each vehicle crossing. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District
Range Facilities	Active Allotment
	Livestock Trailing
	Monitoring Site

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
	Sightseeing
	Hunting
	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland In Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial In Elk winter crucial
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 Mile of Natural Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 2 - Low In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In, crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

LIMITED

This route was designated limited as part of a planning and NEPA process. Public use of this route is limited to season. The public may use this route by all motorized modes, except from December 15 to April 15, when the route is closed to motorized use. The limit is applied to this route because of Elk; Mule deer seasonal range.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species. By closing the route, the potential for future impacts to documented wilderness character would be minimized.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing this route would contribute to minimizing the route's potential for undue and unnecessary soil erosion. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By closing this route, traffic volume in the area would be reduced, minimizing the potential for impacts to sensitive species.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.48 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; USFS		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	FS Adjacent Ranger District
Range Facilities	Active Allotment
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV
	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Photography
	Sightseeing
	Hunting
	Antler Shed Hunting

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is not vital to the overall route network but is the main access road along an water ditch used to service Baker Ranch. This route provides access to other roads on the lower elevation of the Fish Lake National Forest. This route is used for hunting, vehicle exploring, and provides access for OHB loop opportunities and hiking access.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland In Mixed Sagebrush Shrubland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial In Elk winter crucial Leads to Migratory bird high-value habitat
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In Erosive soil - High potential / saline soils In PFYC Class 3 - Moderate
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this route would minimize the potential for impacts to documented resources by providing targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Designating this route would provide targeted recreation activity and experience opportunities that reduce or eliminate the inclination for users to travel off-route.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.09 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector		
Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM; Private		

Additional Information: Route designation applies only to those portions of the route located on public lands managed by BLM.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	YES
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	YES
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	NO

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Jurisdictional Access	Private Lands
Range Facilities	Active Allotment
	Pasture Fence
	Gate

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
Range Facilities	Spring Development
	Corral

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial In Elk winter crucial Within 1/4 mile of Elk winter substantial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	Crosses Erosive soil - Low potential In Invasive vegetation (Halogeton; Russian thistle) In Trespass (Cemetery trespass.)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial In Elk winter crucial Within 1/4 mile of Elk winter substantial Within 1800 feet of Migratory bird high-value habitat
VRM/RSC	In Inventory Class III In VRM Class IV - Major Modification
Special Management Areas	In ERMA - Extensive Recreation Management Area In, Within 1/4 mile of Lands w/ Wilderness Character
Misc. Resources	In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil In PFYC Class 3 - Moderate
Resource Issues	In Erosive soil - High potential / saline soils In Invasive vegetation (Halogeton; Russian thistle) In Trespass (Cemetery trespass.)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By eliminating public motorized access on this route, potential impacts to documented resources associated with motorized use would be reduced. By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. Closing this route to OHV use could minimize the potential for impacts to cultural sites by eliminating public motorized uses from the immediate area. By eliminating public motorized access on this route, potential impacts to documented resources associated with motorized use would be reduced. By limiting access on this route to only administrative and/or permitted use, the potential for impacts to documented resources would be reduced, due to lower traffic volume, low speeds and no public motorized use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Tooter Ogden , Sevier County Commissioner

Surface:	None identified by IDT	Maintained:	Minimally
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: None.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pond/Dam/Reservoir (Breached, filled in--needs maintenance)
	Livestock Trailing
	Gate
	Pasture Fence

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	ATV
	Motorcycle
	UTV

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is one of the primary access routes in the Limestone Cliffs Network Area. The following routes make up the critical network connectivity for this area. SS6001, SS6002, SS6003, SS6004, SS6005, SS6006, SS6044, SS6077. These are the primary maintained roads in this area used for access to Capital Reef National Park, Lower Last Chance Loop, Mussentuchit Sand Dunes, access points to Muddy Creek Wilderness such as Sager's Hole and Chimney's Canyon. This route provides access to camp sites and historic cemetery areas, an horse trail/nonmotorized trail. This is an bladed major road providing camping access on state ground. 10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat. Main

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Sagebrush Shrubland In Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Desert bighorn substantial year-long In Mule deer winter crucial In Elk winter crucial Within 1/4 mile of Elk winter substantial Within 1800 feet of Migratory bird high-value habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class II
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Water Resources	Within 200 meters of Spring
Misc. Resources	In Erosive soil - Moderate potential In PFYC Class 3 - Moderate In Erosive soil - Low potential In, crosses Erosive soil - High potential / saline soils Within 150 feet of Cryptobiotic soil
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

CLOSED

This route was designated closed as part of a planning and NEPA process and is currently not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utey, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route would allow continued access in this area for the identified purpose and need. This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing common access on an pre-existing route, reducing the potential for new disturbances from cross-country use or the creation of new routes to provide similar access. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush
Special Status Animals	In Fringed myotis modeled habitat (S)
	In Spotted bat modeled habitat (S)
	In Townsend's big-eared bat modeled habitat (S)
	In Western bumble bee potential habitat (S)
	In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial
	In Desert bighorn substantial year-long
	In Elk winter crucial
	In Elk winter substantial
	Within 1/4 mile of Mule deer winter crucial
	Within 1/4 mile of Pronghorn year-long crucial habitat
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification
	In Inventory Class III
Special Management Areas	In ERMA - Extensive Recreation Management Area
	In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate
	Crosses Erosive soil - High potential / saline soils
	Within 150 feet of Cryptobiotic soil
	In Erosive soil - Moderate potential
	In Erosive soil - Low potential
Resource Issues	In Invasive vegetation (Halogeton; Russian thistle)

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or man

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/31/02023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Tooter Ogden , Sevier County Commissioner

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.64 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Spur		
Surface:	None identified by IDT	Maintained:	Minimally by County
Origin:	None identified by IDT	Constructed:	None identified by IDT
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pipeline
	Livestock Trailing

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
	Photography
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland In Pinyon-Juniper Woodland Crosses Other - Wash, Intermittent, Perennial
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial Within 1/4 mile of Pronghorn year-long crucial habitat In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate Leads to, crosses Erosive soil - High potential / saline soils Crosses Cryptobiotic soil (West end of route) In Erosive soil - Moderate potential In Erosive soil - Low potential In PFYC Class 2 - Low

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (11/30/2023 Jaydon Mead, Daniel Kauffman, Kyle Smith): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened spe

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Allowing continued use of this existing route, which provides access to dispersed camping, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. This is a County Class D road. The BLM will work with permittees, ROW holders, counties, and other stakeholders as needed to minimize any known resource impacts or user conflicts in accordance with applicable laws and regulations.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative D, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment
	Pipeline

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
	Photography
	Camping
Modes of Transportation	Stock 4 Wheel Drive
	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial Within 1/4 mile of Pronghorn year-long crucial habitat In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate Crosses Erosive soil - High potential / saline soils In Erosive soil - Low potential In PFYC Class 2 - Low In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened spe

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. By closing the route to OHV use, the potential for future impacts to documented wilderness character would be minimized while wilderness characteristics of naturalness and opportunities for solitude would be enhanced.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would contribute to retaining or restoring vegetation and soil cover, minimizing the potential for soil erosion. Closing the route would reduce the potential for impacts to endangered or threatened spe

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
NO	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Agency Facilities	Monitoring Site
Range Facilities	Active Allotment
	Pipeline
	Tank/Trough
	Livestock Trailing
	Livestock Watering Access

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring
	Sightseeing
	Photography
Modes of Transportation	UTV
	ATV
	Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
Modes of Transportation	Stock 4 Wheel Drive

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland Crosses Other - Wash, Intermittent, Perennial Crosses Pinyon-Juniper Woodland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial Within 1/4 mile of Pronghorn year-long crucial habitat In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In PFYC Class 2 - Low In Erosive soil - Moderate potential Within 150 feet of Cryptobiotic soil Crosses Erosive soil - High potential / saline soils

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited to Designated Routes

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt C would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative D

Designation per 43 CFR § 8342.1:

CLOSED

Public OHV use of this route is not allowed. Authorized use can occur on this route, as authorized. This route will not be decommissioned and will continue to be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Allowing continued use of this existing route, which provides access to range features, would minimize the potential for new disturbances to documented resources from cross-country use or the need for construction of new routes to provide similar access. Limiting motorized access on this route would minimize potential for impacts to wildlife habitats. By restricting motorized access to the minimum necessary for administrative purposes, potential impacts on T&E species and their habitats would be reduced. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt D would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Facilitator(s): Cam Gale

Initial Evaluation Date: 11/17/2020

Evaluators: Michael Knight , GIS Specialist Kegen Benson , Biologist Veronica Kratman , Realty Specialist Nate Packer , NEPA Coordinator Jason Anderson , GIS Specialist Brant Hallows , Soils Brandon Jolley , NEPA Planner Joelle McCarthy , Field Manager Michael Utley , Realty Specialist Michael Tweddell , Rangeland Management Specialist Sue Fivecoat , Assistant Field Manager Cindy Ledbetter , Environmental Coordinator	Jerrad Goodell , Aquatic Ecologist Natalie Fewings , Archaeologist Stephanie Bauer , Range Specialist Jim Jennings , Public Lands Administrator Mark Dean , Hydrology Austin Hiskey , Outdoor Recreation Planner Sam Marolt , Geologist Dustin Rooks , Botanist David Halverson , Legal Counsel Jaydon Mead , Recreation Technician Paul Caso , Range Specialist Tooter Ogden , Sevier County Commissioner
---	---

TMA:	San Rafael Swell TMA		
Management Zone:	Limestone Cliffs Route Network Geographic Area		
Length: 0.34 mi.	Width: Dual Track	Class: Primitive Road	Use Level: Low
Route Type(s):	Connector; Y Intersection		
Surface:	None identified by IDT		
Origin:	None identified by IDT		
Jurisdictions:	BLM		

Additional Information: County Class D.

General Evaluation Questions

Does this route:	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	NO
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	YES
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	NO
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	YES
• provide an important linkage between Travel Management Areas or Management Zones?	NO
Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?	
YES	
Might the continued use of this route potentially impact:	
• State or Federal special status species or their habitat?	YES
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	YES
• any special area designations, e.g., National Monuments?	YES
• any other resources of concern?	YES
Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?	
YES	
Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?	
YES	
Route SS6003 may meet the various needs of this route while minimizing impacts or cumulative effects.	

Evaluation Information

Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

Primary Access *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Range Facilities	Active Allotment

Alternate Access *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

Link Access *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

Primary Access/Uses *(main route used to access the destinations or use activities listed)*

Type	Description
Activities	Vehicle Exploring Sightseeing Photography
Modes of Transportation	Stock 4 Wheel Drive UTV ATV Motorcycle

Alternate Access / Secondary Uses *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

Link Access / Infrequent Uses *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

General Memo(s): IDT review of this route's purpose and need (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): This route is part of the Limestone Cliffs Route Network Geographic Area. This route is an secondary route and is not vital for overall route network connectivity, however it does provide public motorized access to the stated purpose and need.

Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Mixed Desert Saltbush In Mixed Blackbrush/Sand Shrubland
Special Status Animals	In Fringed myotis modeled habitat (S) In Spotted bat modeled habitat (S) In Townsend's big-eared bat modeled habitat (S) In Western bumble bee potential habitat (S) In Monarch butterfly potential habitat (S)
Managed Species	In Black bear year-long substantial In Elk winter substantial Within 1/4 mile of Pronghorn year-long crucial habitat In Mule deer winter crucial Within 1/4 mile of Desert bighorn substantial year-long
Special Status Plants	In Wright fishhook cactus (<i>Sclerocactus wrightiae</i>) (E)
VRM/RSC	In VRM Class IV - Major Modification In Inventory Class IV
Special Management Areas	In ERMA - Extensive Recreation Management Area In Lands w/ Wilderness Character
Misc. Resources	In PFYC Class 3 - Moderate In Erosive soil - Low potential In PFYC Class 2 - Low In Erosive soil - Moderate potential

Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.

Potential Alternative Route Designations

Alternative A (Current Management, No Action Alternative)

Area Designation:

Limited

Designation per 43 CFR § 8342.1:

OPEN

This route was designated open to all users, year-round, as part of a planning and NEPA process and is currently managed as a BLM transportation asset.

Alternative B

Designation per 43 CFR § 8342.1:

CLOSED

This route will be decommissioned and will not be managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: Closing this route would reduce overall impact of vehicle use and route footprint in the area. Closing this route would enhance wildlife movement by reducing fragmentation. Closing the route would reduce the potential for impacts to endangered or threatened species and their habitats by eliminating motorized use and removing the route footprint. Per the 2017 Settlement Agreement, BLM is analyzing one alternative route network that designates routes in BLM-inventoried wilderness characteristics as closed to public OHV use. This road is redundant because the public uses it provides are better provided for by existing routes in the area. Closing this route would minimize resource damage and habitat fragmentation.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Closure Method(s): Sign Closed, Natural rehabilitation

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Closing this route in alt B would reduce the overall route footprint in the area and eliminate public motorized use on this route. This would also reduce the potential for impacts to resources associated with this area.

Alternative C

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

How Designation Addresses Criteria Above: This is generally the best location of this existing route for users of the area. Relocation to eliminate route-related impacts would likely create greater impacts to documented resources than application of appropriate mitigation or management of the existing alignment. Continued use of this primitive route would minimize impacts to wilderness characteristics (LWC or Natural Area) by providing reasonable access to these lands on a pre-existing route, reducing the potential for new disturbances from cross-country use.

Designation Criteria Addressed but Not Relevant to Route Issues:

(no known conflicts among users or no known resource concerns to minimize for)

- 43 CFR § 8342.1 (c)
- 43 CFR § 8342.1 (d)

Memo(s): IDT review of how this designation addresses the designation criteria (10/30/2023 M. Utley, J. Anderson, B. Jolley, B. Hallows, M. Dean, P. Caso, J. Chigbrow, H. Harridge, G. Bascom, D. Mortensen, S. Fivecoat): Opening this route provides the least resource damaging access to the feature identified in the purpose and need because the route currently exists and the area has already been identified for this type of public motorized use. Under alternative C, the impacts to resources in this network area would be minimized by closing other routes within this network area (see Appendix C of the EA for additional minimization considerations and mileage details for this network area).

Alternative D

Designation per 43 CFR § 8342.1:

OPEN

This route is open to all users, year-round.

Specific Designation Criteria Addressed and Relevant to Route Issues:
