

**Facilitator(s):** Cam Gale

**Initial Evaluation Date:** 4/12/2019

**Evaluators:** Pam Riddle, Wildlife Biologist  
 Ashley Losey, Archaeologist  
 Katie Stevens, Outdoor Recreation Planner  
 Bill Jackson, County Roads  
 David Williams, Range Conservationist  
 Lisa Wilkolak, Realty Specialist  
 Bill Stevens, ORP - Wilderness/WSA/LWC

Gabe Bissonette, Aquatic Ecologist  
 David Pals, Geologist  
 Greg Halliday, County Council  
 Doug Wight, GIS Specialist  
 David Halverson, Legal Counsel  
 Bryan Torgerson, Representative

<b>TMA:</b>	Labyrinth Canyon/Gemini Bridges		
<b>Length:</b> 0.22 mi.	<b>Width:</b> Dual Track	<b>Class:</b> Primitive Roads	<b>Use Level:</b> Low
<b>Route Type(s):</b>	Spur		
<b>Surface:</b>	None identified by IDT	<b>Maintained:</b>	None identified by IDT
<b>Origin:</b>	None identified by IDT	<b>Constructed:</b>	None identified by IDT
<b>Jurisdictions:</b>	BLM		

**Additional Information:** None.

### General Evaluation Questions

<b>Does this route:</b>	
• either wholly or in part, have a right-of-way grant or is it simply an officially-recognized route maintained by a county or another government agency?	<b>NO</b>
• provide commercial, private property, or administrative access, e.g., via permit, ingress/egress rights or other jurisdictional responsibility?	<b>YES</b>
• provide a principal means of connectivity within a Travel Management Area or Management Zone?	<b>NO</b>
• exist as a result of a previous agency land use or implementation-level planning document decision and is managed as a transportation facility asset?	<b>NO</b>
• provide an important linkage between Travel Management Areas or Management Zones?	<b>NO</b>
<b>Does this route provide network connectivity that contributes to recreational opportunities, access to specific recreation sites, public safety, or other public multi-use access opportunities enumerated in agency Organic laws?</b>	
<b>YES</b>	
<b>Might the continued use of this route potentially impact:</b>	
• State or Federal special status species or their habitat?	<b>YES</b>
• cultural or any other specially-protected resources or objects identified in Agency planning documents?	<b>YES</b>
• any special area designations, e.g., National Monuments?	<b>YES</b>
• any other resources of concern?	<b>YES</b>
<b>Can the anticipated potential impacts to the identified resources be avoided, minimized, i.e., reduced to acceptable levels, or be mitigated?</b>	
<b>YES</b>	
<b>Can the commercial, private property, recreation or public uses of this route be adequately met by another route or routes that may minimize impacts to the resources identified as part of this evaluation or that may minimize cumulative effects on various other resources?</b>	
<b>NO</b>	

## Evaluation Information

### Commercial, Administrative, Property and Economics

The following items help to identify the purpose and need of this route. This route provides access to the following facilities and/or jurisdictions for the purpose of carrying out administrative and/or authorized operations or for jurisdictional access.

**Primary Access** *(leads directly to the listed jurisdiction or facility, and IS the main route used for access)*

Type	Description
Lease Facilities	Commercial Rec Permit (SRP) Other Rec Permit (SRP)
Range Facilities	Active Allotment
Mineral Facilities	Known Potash Lease Area

**Alternate Access** *(leads directly to the listed jurisdiction or facility, but IS NOT the main route used for access)*

Type	Description
None identified by IDT	

**Link Access** *(does not lead directly to the listed jurisdiction or facility, but is required to access a primary access route)*

Type	Description
None identified by IDT	

### Recreational Uses

The following items help to identify the purpose and need of this route. This route:

- provides public travel access to the listed recreation sites using the listed travel modes, and/or
- provides for recreational activity and experience opportunities in the area, and/or
- provides important route network connectivity for recreational access between two or more other routes.

**Primary Access/Uses** *(main route used to access the destinations or use activities listed)*

Type	Description
Recreation Destination	Jeep Safari Trail System
Activities	Jeeping/4-Wheeling Scenic Driving Special Recreation Permits 4WD Organized Event
Modes of Transportation	Motorcycle Stock 4 Wheel Drive UTV/ATV Modified 4 Wheel Drive

**Alternate Access / Secondary Uses** *(used to access the destinations or use activities listed, but not considered the main route)*

Type	Description
None identified by IDT	

**Link Access / Infrequent Uses** *(rarely used to access the destinations or use activities listed)*

Type	Description
None identified by IDT	

### Resource and Use Issues

The following items help to identify potential natural and cultural resource issues associated with the location and use of this route. This route is located in, leads to, crosses, or is within a set distance of the following resources or issues.

Resource Type	Description
Biomes	In Pinyon-Juniper
Managed Species	In Desert bighorn sheep yearlong habitat
	In Desert bighorn sheep lambing area
Special Status Plants	In Jones cycladenia modeled potential habitat
VRM/RSC	In VRM Class IV - Major Modification
Special Management Areas	In SRMA - Special Recreation Management Area
Misc. Resources	In High-Use Filming Location
	In Erosive Soil - Moderate Potential
Resource Issues	In Route Proliferation

*Note: Specific sensitive resources, such as cultural resources, paleontological resources, or threatened or endangered species are not listed in this report for their protection, but were considered during the evaluation of this route.*

### Potential Alternative Route Designations

#### Alternative A (Current Management, No Action Alternative)

##### Area Designation:

Limited to Designated Routes

##### Route Designation:

Open

##### Specific designations by user type:

**OHV Public:** Designation per 43 CFR § 8342.1: Open - The public may use this route by all motorized modes of transportation, year-round.

**Non-motorized Public:** The public may use this route by all non-motorized modes of transportation, year-round.

**Authorized/Permitted Users:** Authorized users may use this route by all modes of transportation, year-round.  
*Additional users may be authorized by the BLM through future authorizations.*

**Administrative/Official Users:** All Federal, State and Local agencies may use this route by all modes of transportation, year-round.

## Alternative B

### **Comprehensive Designation:**

CLOSED

This route will be decommissioned and not managed as a BLM transportation asset. Unless otherwise signed, cross-country foot and animal use is allowed in the area.

### **OHV Public: Designation per 43 CFR § 8342.1: Closed**

### **Specific Designation Criteria Addressed and Relevant to Route Issues:**

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

**How Designation Addresses Criteria Above:** Closing the route would minimize the potential for conflicts between off-road vehicle users and dispersed, non-motorized/non-mechanized forms of recreation. Closing the route would reduce the potential for travel-related impacts to special status species and their habitats by eliminating motorized use and removing the route footprint. Closing this route would minimize impacts to wildlife habitat by eliminating motorized uses (reducing the potential for harassment of wildlife) and removing the route footprint (reducing habitat fragmentation.) Closing this route would contribute to retaining or restoring vegetation and soil cover by eliminating motorized use and reducing the route footprint, thereby minimizing the potential for future soil erosion and vegetation damage.

### **Designation Criteria Addressed but Not Relevant to Route Issues:**

*(no known conflicts among users or no known resource concerns to minimize for)*

- 43 CFR § 8342.1 (d)

**Closure Method:** Natural Rehab

## Alternative C

### Comprehensive Designation:

OPEN W/ MANAGEMENT

### Specific designations by user type:

**OHV Public:** Designation per 43 CFR § 8342.1: Open - The public may use this route by all motorized modes of transportation, year-round.

**Non-motorized Public:** The public may use this route by all non-motorized modes of transportation, year-round.

**Authorized/Permitted Users:** Authorized users may use this route by all modes of transportation, year-round.  
*Additional users may be authorized by the BLM through future authorizations.*

**Administrative/Official Users:** All Federal, State and Local agencies may use this route by all modes of transportation, year-round.

### Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

**How Designation Addresses Criteria Above:** This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Continued use of this route with the added application of specific management prescriptions, would minimize potential impacts to documented resources. Continued use of this route would minimize conflicts among various users of public land by providing access to other public land areas beyond the urban interface, reducing user concentrations and the potential for impacts to documented resources within the urban interface. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

### Designation Criteria Addressed but Not Relevant to Route Issues:

*(no known conflicts among users or no known resource concerns to minimize for)*

- 43 CFR § 8342.1 (d)

### Potential Management Actions:

**Maintenance:** Signing - Directional

*Potential management actions may be incorporated with an overall monitoring strategy that would assess the status and/or integrity of the potentially impacted sensitive resource or resource issues identified as they relate to various external factors, e.g., climate cycles, exotic species introduction, visitor use levels (type, intensity, and season of use), etc. Monitoring data that indicate a decline in resource integrity or reveal methods of mitigation that proved to be unsuccessful would then trigger adaptive and appropriate responses aimed at restoring integrity or successfully mitigating undesirable conditions.*

## Alternative D

### Comprehensive Designation:

OPEN W/ MANAGEMENT

### Specific designations by user type:

**OHV Public:** Designation per 43 CFR § 8342.1: Open - The public may use this route by all motorized modes of transportation, year-round.

**Non-motorized Public:** The public may use this route by all non-motorized modes of transportation, year-round.

**Authorized/Permitted Users:** Authorized users may use this route by all modes of transportation, year-round.  
*Additional users may be authorized by the BLM through future authorizations.*

**Administrative/Official Users:** All Federal, State and Local agencies may use this route by all modes of transportation, year-round.

### Designation Criteria Addressed and Relevant to Route Issues:

- 43 CFR § 8342.1 (a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- 43 CFR § 8342.1 (b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- 43 CFR § 8342.1 (c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

**How Designation Addresses Criteria Above:** This route is important for network connectivity, serving commercial and recreation users in this area. Allowing continued use of this route would minimize potential impacts to documented resources by providing a common access into or across the area on a pre-existing route, reducing the potential for new disturbances from cross-country use or the need for construction of new routes to provide similar access. Allowing continued use of this route would minimize potential impacts to documented resources by concentrating motorized use (rather than dispersing it) on an alignment capable of accommodating the route's anticipated traffic volume. Continued use of this route with the added application of specific management prescriptions, would minimize potential impacts to documented resources. Continued use of this route would minimize conflicts among various users of public land by providing access to other public land areas beyond the urban interface, reducing user concentrations and the potential for impacts to documented resources within the urban interface. Route provides access to unique and/or exceptional recreational opportunities without causing greater than minimal adverse effects on documented resources. Due to the low traffic volume and speeds expected on this route, allowing its continued use would contribute to minimizing the overall route network's potential for causing undue and unnecessary soil erosion, habitat disruption and/or vegetative damage.

### Designation Criteria Addressed but Not Relevant to Route Issues:

*(no known conflicts among users or no known resource concerns to minimize for)*

- 43 CFR § 8342.1 (d)

### Potential Management Actions:

**Maintenance:** Signing - Directional

*Potential management actions may be incorporated with an overall monitoring strategy that would assess the status and/or integrity of the potentially impacted sensitive resource or resource issues identified as they relate to various external factors, e.g., climate cycles, exotic species introduction, visitor use levels (type, intensity, and season of use), etc. Monitoring data that indicate a decline in resource integrity or reveal methods of mitigation that proved to be unsuccessful would then trigger adaptive and appropriate responses aimed at restoring integrity or successfully mitigating undesirable conditions.*
