To the BLM:

Unfortunately, you continue to always disappoint those of us who truly care about the protection of endangered species, public lands, and climate change. The BLM for over a century has reneged on its responsibility to the majority of people in this country. We are in one of the most serious species extinction crises in history. Our public lands have been negatively degraded.

I hope that I won't be disappointed by the BLM, once again. I am asking you to do everything possible to protect sage grouse. They are magnificent birds, and they need your help to protect them now!
