

Appendix K: Livestock Grazing Allotments

Introduction

The BLM manages approximately 245 million acres of public lands. On approximately 157 million acres of those public lands, the BLM manages livestock grazing use. The BLM administers nearly 18,000 permits and leases held by ranchers who graze their livestock, mostly cattle and sheep, at least part of the year on more than 21,000 grazing areas, called “allotments.” The exact amount of grazing that takes place each year on BLM-managed public lands can be affected by such factors as drought, wildfire, and market conditions.

Rangeland is a type of land, not a use. Composed of soil, water, air, flora, and fauna, rangeland resources generate many values, uses, and activities. Directly and indirectly, rangelands contribute environmentally, economically, and socially from local to global levels. Rangelands provide protection to watersheds, quality water supplies, recreation, scenic beauty, and opportunities for enjoyment, relaxation, and solitude. Rangelands provide forage and habitat for many species of organisms, including insects, birds, wildlife, and wild horses by converting energy from the sun into food, fiber, and cover.

In Colorado, management of rangeland occurs on approximately 8.3 million acres of public land managed by the BLM. Nearly 1,500 livestock operators are authorized grazing use on 2,500 allotments through an approved grazing permit/lease. Generally, permits and leases cover a 10-year period, and are renewable if the BLM determines that the terms and conditions (such as the kind and number of livestock, season of use, and amount of use permitted each grazing year) of the expiring permit or lease are being met. When permits/leases expire, before being renewed they undergo a review for conformance with Resource Management Plans, as well as for compliance with environmental documentation requirements. An important part of the renewal process involves soliciting comments, interest, concerns, and resource information through public scoping. The public comments along with internal scoping and all other available information is used by BLM Field Managers in order to prioritize and rank permit/lease renewals for processing on a priority basis. (For more information on the Range Program, visit: http://www.blm.gov/co/st/en/BLM_Programs/grazing.html)

The following table, Grazing Allotment Summary, provides allotment and grazing use data for all allotments currently permitted for livestock grazing use within the Planning Area.
