I am in favor of development of the 1002 Area of the coastal plain in ANWR. The benefits far outweigh the negatives.

Domestic energy production makes us economically and militarily strong, represents high paying jobs, and modern engineering science offers better footprint and eco-mindedness than ever before.

I am an independent voter; the Democrats have always tried to stop domestic projects; the US does this kind of development better than any country maybe excepting Norway.

This is the 21st Century and the best science ever is available.

Thanks,

John Allen
