Dear BLM:

I am writing to let you know I offer STRONG support for the drilling in the small area of the Arctic Refuge that is being proposed.

Please see that the drilling companies and their equipment behave in such a way as to minimize the risk of damage to the surface areas where they are drilling. And please make sure that they have adequate plans in place to mitigate a spill if one should happen.

There is absolutely a way we can do this drilling and protect the environment at the same time regardless of what the zealots on the other side say. It seems to me that your job is to make sure that a proper balance occurs between human activities and needs and animal needs.

Please feel free to contact me if you have any questions.

Thank you.

Jim Arthur
