Dear Ladies and Gentlemen,

This letter is to urge you to vote NO for any and all drilling in the Arctic Refuge. I'm sure you have data, or think you have data, to support your point of view, but the fact remains that 70% of all Americans do not want drilling in the Arctic Refuge. We have gone way too far in mining our precious and increasingly rare earth elements to support an unrestrained human population. We are smarter and can be far more resourceful than to continue to use fossil fuels to the detriment of our wildlife, animals, indigenous populations, water and climate.

Please provide leadership in challenging our growing human population to be creative and prosperous in living within our true means on this finite planet. The Arctic Refuge is not for human consumption.

Thank you,  
Taylor Goforth
