Dear Bureau of Land Managment,

HEAR US HERE IN MONTANA! Hear OPPOSITION to your efforts to develop an oil and gas program in the Arctic National Wildlife Refuge.

The Department of the Interior must closely examine the science and fully evaluate the impacts at every stage of energy development on the Refuge's wildlife, water, subsistence, and other values for which it was created.

It is UNACCEPTABLE for the Trump administration to go ahead with intention you've indicated to expedite the review process and hold lease sales by next year.

This rushed timeline will NOT allow for the full analysis required under the law. IT IS MANDATORY to do so, even though there are only the slim-est of chances you'll meet the Department's obligations to responsibly steward one of the crown jewels of the nation's National Wildlife Refuge System.

You are pushing for a HORROR SHOW in the MAKING, AT EVERY TURN.

Energy development raises a suite of environmental issues that forecasts permanent harm to the Arctic Refuge's fragile environment. Scars on the tundra from heavy seismic equipment will remain visible decades later. Nesting birds will be vulnerable to numerous, inevitable industrial oil spills and increased predation. The Porcupine Caribou Herd will face potential population-level impacts from roads and pipelines displacing the herd from calving grounds on the narrow coastal plain. The long-term conservation of a holistic Arctic ecosystem in the U.S. will be significantly jeopardized by embarking on this oil and gas program in the Refuge.

These and other impacts must be evaluated for their effects that will extend far beyond the footprint of any physical development. The Refuge should remain a place in America's Arctic for birds and wildlife seeking refuge from the pressures of climate change and development.

The Department MUST exercise EXTREME CARE as you collect the science and consider these issues, which clearly indicate why an oil and gas program does not belong in the Arctic National Wildlife Refuge. THIS IS *OUR* NATURAL HERITAGE, NOT YOUR PLAYTOY *OR* THAT OF YOUR CORPORATE FUNDERS!

Sincerely,
Paula Gordon
