Scoping comment: The destruction of wilderness and wildlife by this initiative violates the intent of the Refuge status. Oil and gas drilling take place worldwide whereas we only have a few pristine places left for wilderness and wildlife. There is absolutely no justification for violating this area with industrial development. This area is owned by the American people and it is the BLM's duty to serve as an honest steward of this area in perpetuity. You are stealing vital resources from the American people with this initiative and contributing to the destruction of our natural heritage. I deeply oppose this initiative.
