I am offended and frightened by the lack of respect this administration shows for our National Arctic Refuge heritage.

The review process is being rushed and blatantly manipulated.

YES - there is evidence of global warming! Have returned from travels to Iceland and Norway where rapid shrinkage of icebergs, glaciers is obvious.

This will damage the habitats of polar bears, birds, fish, caribou and porcupines.

How does this impact the culture of Native American Alaskans?

Benefits to the Alaskan economy seems minimal -- yet money/profit will pour into pockets of outsiders.

Stop this invasion of our nation's valuable wildlife and environmental heritage!!!!
