Hello BLM,

I am an Alaskan, born and raised, and I would like to see the coastal plain protected. The caribou and their calving grounds cannot be replaced. The more we drill for oil, the less we innovate for other renewable resources, which is not good. The world does not need more oil, but it does need intact ecosystems, and wild animals with calving grounds and space to roam without threat from industrial predators.

Please take my comments and the comments of others in support of not drilling the coastal plain, and do the right thing. Otherwise you are a somebody who did nothing when you could have been the somebody that everyone asks to do something.

Thank you,

John Gaedeke
Chairman - Brooks Range Council
