Greetings:

The Arctic National Wildlife Refuge is one of the most sensitive environments on earth, breeding grounds for caribou, denning for polar bear, and habitat for hundreds of migrating bird species. Roads, mining and drilling equipment, and likely oil spills would ruin this critical environment. Furthermore, in view of CLIMATE CHANGE, further oil production and burning is complete foolishness.

I most strongly object to this dangerous and short sighted project. Please do not allow these leases to be approved.

Sincerely,

Eve Gordon, MD  
Edmonds, Washington
