I am totally opposed to oil and gas leasing on the coastal plain in Alaska. With the warming and drying of the climate greatly influenced by human contributions - it seems so stupid to not transfer energies used for fossil fuel use to ones that are more sustainable. Opening up even more lands is not only stupid, but embarrassing. How can we, as a nation, be behaving in such a way in such times? Shame on us. We need to transition to alternative fuel sources that do not have such a negative impact on the planet.
