- This is a rare chance to ensure America's greatest wilderness remains pristine to protect the fish, wildlife and migratory birds that depend on it. Between Arctic Refuge and the adjacent Arctic Ocean one finds 700 kinds of plants, 200 species of birds, 47 mammal species and 42 fish species. No other protected area in the entire circumpolar north has such abundant and diverse wildlife. This is very important to me and my extended family. Please do not drill in the arctic. Thanks
