Why should we who are so far away from that Refuge care?

- Because the birds that frequent our own Dungeness National Wildlife Refuge migrate to Alaska.
- Because the legislation that would allow drilling changes the purpose of that National Wildlife Refuge and it could happen to us.

However, we should also care because:

- Drilling will require a network of roads that would disrupt wildlife on the Refuge.
- The Alaska native people that consider the Refuge sacred lands and rely on caribou that live in the Refuge will suffer.
- We do not need more oil.
