To: blm\_ak\_coastalplain\_EIS@blm.gov

I am writing to strongly oppose the selling of leases for drilling for oil and gas in ANWR. The United States cannot and should not sacrifice this irreplaceable and precious natural area. We have what we need to fuel our economy in the form of renewable energy resources, increased energy efficiency and other more easily available fossil fuels. The planet cannot afford the loss of ANWR. It is time for the federal government and big business to join the 21st century and to look at the big picture, not just the short term rewards and profits of fossil fuels.

Thank you.
