Ryan Zinke,

Please reject the proposal to open the coastal plain of the Arctic National Wildlife Refuge to drilling.

With the recent announcement that atmospheric carbon levels have passed 400 ppm, considered by the majority of climate scientists to be a point of no return, we must do everything in our power to reduce and phase out fossil fuel usage.

Fossil fuel extraction in the ANWR is a short-sighted policy that mainly stands to benefit energy corporations, while exacting permanent damage to one of the last pristine ecosystems on earth.

This drilling proposal is wrong. Do not accept it.
