Dear BLM -

As someone who has visited Prudhoe Bay and watched the development of the Alaskan oil industry for many years, I am OPPOSED to further leases or development in the coastal plain and the ANWR. These are pristine areas of Alaska for wildlife and any type of development will disturb the natural balance of these sensitive areas.

Further, global warming will have an impact on the permafrost in these areas as well as many others in northern Alaska, and any development on the north Coast will have serious problems with ground stability in the future.

Please listen to the people, and stop the process of leasing more land in the ANWR and other coastal plain areas!

Thank you,

Harry Hayward  
University Place, WA.
