Hello, I am a high school student taking Petroleum Engineering. I fully support the BLM movement towards increasing lease sales for oil and gas development in Alaska. This would allow the economy in America to boom due to the increase in jobs and opportunity for workers in the US. Also, the industry is on a down slope right now and is affecting families drastically through the lack of demand in drilling. Although, some people think that the increase in drilling in Alaska would affect the environment; however, there are many ways to drill environmentally friendly through cementing the well bore to disallow oil to seep out into the reservoir and rock layers. So, thank you for the opportunity to comment and help this important matter.
