Dear Secretary Zinke,

Why did you stop caring about public lands, or did you ever? Seriously, what's your motivation, is it just money? What do you gain from the havoc you're wreaking upon the DOI? Large resource extraction companies have plenty of money already, what benefit is it to you that they have more? You're one of the reasons I'm no longer proud to be an American and have no more trust in the conservative party. I'm still going to get out and hike, backpack, fish, and hunt, on our public lands for as long as they're around, but the sad reality is that's no longer a certainty.

Sincerely,
Jason Hatfield
