I am writing to add my voice to those of other Americans strongly objecting to my government seeking to add to our "oil dominance" by drilling in the Arctic Refuge. There is no justification for risking catastrophic damage to this fragile wilderness just to add to the glut of oil already available to the world. Just the infrastructure activity accompanying oil exploration and drilling will destroy habitat critical to caribou, bears and over 200 species of birds. Our responsibility to our children to preserve this pristine wilderness dictates that the Trump administration abandon this folly.

Very truly yours,

—
