Please, sirs, do not compromise the safety of our Alaskan Wilderness and shores. Drilling in the interior and off shore are going to be a disaster waiting to happen. As a citizen of the Lower 48, I understand the necessity of protecting the wilderness, from drilling and mining. I have seen the destruction of lands when mining is prevalent and accepted.

Please, sirs, reconsider. Were you to use the lands for renewable energy, such as wind farms and solar farms, I would be more inclined to agree, with the use of these lands. The present plans, for the wilderness are appalling. I fear for the future.

Very sincerely,
Rose Ann Haye614 17th St.W.
