Ryan Zinke,

I stand with the Gwich'n Nation in their protection of sacred lands. I stand with the caribou, musk oxen, wolves, polar bears and nearly 200 species of migratory birds. Especially those awesome gyrfalcons.

And I stand with people everywhere who recognize that fossil fuels must be left in the ground if we have any hope of passing on a safe climate to our children and their children.

I DEMAND you reject the proposal to open the coastal plain of the Arctic National Wildlife Refuge to drilling.

Locally drilling would have devastating and permanent impacts on the refuge's wildlife, as well as the Gwich'in people who rely upon its caribou herd.

This is a wildly selfish and short-sighted proposal. Just say NO!
