The risk to the caribou is not worth the profit or the jobs. I am a working man. At 68 years of age I have lived a life of hard work. I fed my family as a logger. I know what it means to need a job.

I came North in 2009. I have made Alaska my home. I work as a CDL driver and tour guide.

I was at Old Crow 2015 when the caribou moved through the country.

You know that this is being rushed through. Have you seen what Arctic oil development looks like. Have you been to Prudhoe Bay? I have driven out of Prudhoe Bay as a professional driver. Do you think the Porcupine herd would really survive that?

I so no to drilling in the 1002.
