Some things can never be replaced. The need for energy from gas and oil does not justify the destruction of the Arctic Wildlife Refuge. Corporate dollars should not be allowed to dictate policy. Alternate sources are becoming more and more possible. The timing is all wrong in seeking new resources in old places (underground). Our nation's needs are capable of being met without losing a unique portion of the land we control for the sake of sales to other countries.

Please try to think ahead. We will never manufacture new air or water. We are given a chance to protect our planet. No new efforts to develop new areas!!
