I and my family strongly oppose any drilling or development in the Arctic National Wildlife Reserve. It is unnecessary and unconscionable. We have a glut of gas now and bids on existing leases in the lower 48 are coming in at about 10% of offers. Any action in this pristine wilderness threatens species, native rights, and the rights of all Americans and people of the world to clean air, water, and ongoing life. YOU MUST NOT DRILL IN ANWR.

Mark Kuhn and family
