Dear Secretary Zinke,

I am strongly opposed to any gas or oil development in the Arctic National Wildlife Refuge. This pristine area is among the most diverse and sensitive areas in the world. It was made into a refuge for a reason!

It is not a place to allow leases for gas and oil exploration with the inherent environmental risk that will come with that, to the land and the diverse species that inhabit that land.

We as the United States of America need to focus on energy conservation, and renewable energy sources such as wind and solar rather than further scarring our precious planet.

I hope you will listen to the people of this country and their efforts to save the planet. Look at the science and believe in it.

Thank you,

Sarah Kailin
