Dear Sir or Madam,

I cannot express how opposed I am to oil exploration and drilling in the a protected wild area. The U.S is nearly swimming in oil as a result of fracking and traditional domestic sources, This is nothing more than the celebration of the worst from of greed which our time seems most famous for.

Is it the case, that NOTHING at all of the natural environment including the oceans, lakes, rivers, forests, plains, tundra should be protected and saved for the future of the earth ? Are we current humans somehow entitled to consume and destroy all natural things for greed and to supply ever-more giant engines in SUVs at higher and higher speeds (= consumption) ?

This is unacceptable to me and most people i know. Elected officials should be protecting these things instead of selling them off in trade for political donations et al.
