I have public comment AGAINST allowing any weakening of the current protections for the ARCTIC NATIONAL WILDLIFE REFUGE.

DO NOT allow any changes to the current protections for this pristine area. Do not allow any permits for drilling in the ANWR.

As an American, I strongly advise you to NOT allow any further drilling or exploration in the Coastal Plain, or anywhere else in the current boundaries of the ANWR.

Senator Murkowski's estimate of \$1B would come to the US Treasury from oil and gas development is WRONG, and her thinking is flawed.

You have already shrunken the national monuments in the contiguous US Secretary Zinke. Don't compound your error by making another huge mistake in the ANWR.
