There are far too few people concerned about the environment we are leaving our progeny but I am one of them. I protest mankind's trashing of our environment. No place seems sacred or protected anymore and we are running out of pristine areas supporting our natural flora and fauna.....all necessary for a healthy Earth able to support us, seven and a half billion people! I concur 100% with what Environment America says, namely.....'The Arctic National Wildlife Refuge is one of the greatest truly wild places left on Earth. It's sanctuary to some of the most diverse and magnificent wildlife in Alaska -- polar bears, wolves, musk oxen and vast herds of caribou -- and the oil and gas industry should not be allowed to trample its amazing landscapes and foul its pristine air and water'. We need to aggressively address climate disruption and this includes keeping as much fossil fuel in the ground.

The environmental impacts from all stages of oil and gas development, including seismic activities, leasing, exploration drilling, development and its use must be fully considered. I urge the Department of the Interior to uphold all protections for the Arctic National Wildlife Refuge.'

Sincerely,

Alethea Mackinnon
