Dear Bureau of Land Managment,

Drilling in a sensitive wildlife area is the last thing our conscientious country should be considering when it comes to energy. Climate change is real. We need to reduce our depence on oil. We should be focusing our efforts on energy alternatives.

Please preserve the Artic National Wildlife Refuge for the wildlife that depend on it. Birds from that region migrate widely. Interrupting their breeding grounds has lasting, disastrous and avoidable consequences worldwide.

Sincerely,

Amalia Magaret

Seattle, WA 98115
