Hello to everyone -- Here we are in our most remarkable land that is near and dear to our hearts. We are blessed with so many gifts from Mother Nature offered to us so generously. We have wildlife coursing paths, responding to instinctively to their natural ways. We have our Native peoples who have lived for millennia in harmony with Nature's offerings. We have natural resources from the land and sea that can enhance human life. If these same resources are to be harvested, we must consider the impacts on all factors involved. We must not proceed in haste to take selfishly, so that a few get rich quick by carelessly ripping from the land and sea.

To the developers == pick your places. There are oil resources in the Naval Reserves west of Prudhoe Bay yet to be developed that would not have the impact that extraction from the Arctic National Wildlife Refuge would have.

Please keep our beautiful Arctic National Wildlife Refuge as Nature made it now and forever more. Thank you very much.

Janice Morrow
