Hello, I am a high school student studying petroleum engineering in Louisiana. As a class, we read articles going on in the world petroleum business and give our own statements about them. I agree with the idea of leasing in Alaska as it gives good job opportunities and it would help you U.S. economy. With new technology, drilling and production is safe and efficient. If someone were to drill safe, drilling and production would cause no harm to the environment.

Thank You,  
Cameron Morris
