As a visitor to Alaska - and who has visited Alaska's Coastal plain, I beg you not to disrupt our last bastion of wilderness and allow drilling. It is unnecessary and will only benefit oil companies. Not Alaskan's, Not the US, and DEFINITELY not the wildlife.

We as a country should be doing everything to move AWAY from oil, and towards more renewable resources. But understanding that this administration is all about sending our country back to the 1950's - before global warming was even a defined term - I felt compelled to write, and state that we must say NO to this project.

As a citizen of the US, and a visitor to Alaska, I hope to be heard - but with the current cadre of cabinet members/President I do not feel that it is likely at all that any input will even be regarded - a decision has likely already been made by this corrupt government.
