I would like to submit my NO vote for drilling in ANWR. President Trump approves this "just because nobody else could do it" rather than giving it due research, Lisa Murkowski snuck this into the tax bill because it would not otherwise pass. ANWR is the last untouched wilderness in the Arctic and is a breeding ground for many animals that are already threatened in today's world. This area is designated a wildlife refuge, and oilfields are not compatible with wildlife. Also, an oil spill would be devastating. Please, NO drilling in ANWR.
