I am writing as a concerned, U.S. Citizen. I believe that the Arctic Refuge / ANWR should not have oil or gas drilling. ANWR was developed with years of bipartisan support, and should be maintained to protect wildlife. Oil and gas drilling has extensive affect on wildlife, including roads, infrastructure, and the potential for spills. ANWR is too sensitive and pristine to risk these intrusions. It is not economical for companies to drill in ANWR. Please, do not allow oil or gas drilling within ANWR. Thanks.
