As a concerned American citizen, registered voter and former resident of Alaska, I am opposed to opening the Arctic Refuge to oil & gas drilling. We need to be moving towards all forms of renewable energy (which most Americans are, except for the current Republican mafia in control). We have plenty of oil supplies now and do not need to destroy more of our precious environment. If we all wanted to live in New York City where everything is paved over and developed.....we would. Most of us prefer to live where we can still enjoy our earth in all it's beautiful, wild glory.

Get a grip, you idiots.
