To whom it may concern,

I offer my comments as an extremely concerned citizen.

The Arctic National Wildlife Refuge is no place to be drilling for oil and gas.

It is solely a money grab that will benefit very few Americans and hurt many living creatures and ruin one of our last remaining wild areas, to the detriment of future generations.

If the majority of our citizens and politicians were in favor of this drilling then the plan to do so would not be so rushed and corrupt.

This ill-conceived drilling plan is a total sell out.

Please do your job and protect our beautiful Country!!!

Sincerely,
Daniel Nieder
