Please do not open up the National Arctic Refuge for oil and gas drilling. President Trump's idea of unraveling everything that President's have put in place before him is dangerous and is detrimental to wild life and the natural order of the region. Find some where to do your drilling where it doesn't create a harmful impact for man and wildlife. It's all about money so find somewhere else to drill to make the oil and gas companies fat, rich and happy.

A very concerned citizen,

ELN
