Dear People,

In the current climate, I have little hope that public input has the respect that it is due, but still I have to add my thoughts to the debate. Opening the ANWR to the oil and gas industry for drilling breaks my heart. There is NO NEED for this. I won't go into arguments, I'm sure everyone knows this whether they are willing to admit it or not. We set this land aside for protection - now and forever! We cannot keep caving to big money until nothing is left worth protecting. We have the means to develop other sources of energy. At some point we will have to do this. Why not now?

Sincerely,

Chris Neuman &gt;&lt;&gt;&lt;
