To: blm_ak_coastalplain_EIS@blm.gov

To whom it may concern,

It is not only unethical, but also irresponsible to open the Arctic National Wildlife Refuge for oil drilling. Climate change is the biggest threat to human society in modern times, and oil production and consumption only amplifies that phenomenon. Not only that, the arctic is a pristine natural environment highly threatened already by the effects of climate change. It is unfair and unethical to force out the native wildlife and thus the indigenous peoples that rely on that wildlife as their food source. Please protect this unique habitat by rejecting the lease of arctic lands for drilling.

Thank you,

Tessa Munson
